## About the Bee Active Travel Scheme

The scheme has been designed together with the community, to provide the best quality active travel scheme for residents.

### What the scheme will provide

- Upgraded traffic junctions
- New and improved crossing points
- Continuous footways
- Traffic calming measures
- Low-traffic zones in selected streets

### What the scheme will achieve

The scheme will improve connectivity to Bury town centre and other local facilities, making it easier for people to walk, wheel or cycle for local journeys.

This will help people to choose healthier, greener ways to travel.

Example of a modal filter

### What to expect

As with all works carried out on the highway, you can expect some temporary unavoidable disruption while works are in progress, such as:

- Advance warning signs will be installed before works start at each site
- All diversion routes will be clearly signed
- After the works you can expect to be able to get around and reach the town centre more easily

Example of a puffin crossing

# Where can I find out more about the phase 2 programme of works for Fishpool and Pimhole Active Travel scheme?

The phase 2 scheme is split into 12 individual projects, each focussed on specific roads and streets within the Fishpool and Pimhole areas. More detailed information is at our website.
