

Bury Five Year Supply of Deliverable Housing Land

1 April 2025 – 31 March
2030

November 2025

1 Context

- 1.1 One of the Government's main objectives in the National Planning Policy Framework (NPPF) is to significantly boost the supply of homes and ensure a sufficient supply of deliverable housing sites to meet local housing targets. The Framework states that local planning authorities should identify and update annually a supply of specific deliverable sites to provide a minimum of five years' worth of housing against their housing requirement set out in adopted strategic policies, or against their local housing need where the strategic policies are more than five years old, with an appropriate buffer as set out in NPPF paragraph 78.
- 1.2 The housing target for Bury is set through the Places for Everyone Joint Development Plan, adopted by the Council with effect from 21 March 2024. This sets out stepped housing targets for the Borough over the plan period from 2022-2039.
- 1.3 This Statement calculates whether there is sufficient deliverable housing land against the housing targets set out in Policy JP-H1 of the Places for Everyone plan.

2 Deliverable Housing Land Supply

Deliverable Land

- 2.1 The NPPF states that to be considered deliverable, sites for housing should be **available** now, offer a **suitable** location for development now, and be **achievable** with a realistic prospect that housing will be delivered on the site within five years. In particular:
- a) sites which do not involve major development and have planning permission, and all sites with detailed planning permission, should be considered deliverable until permission expires, unless there is clear evidence that homes will not be delivered within five years (for example because they are no longer viable, there is no longer a demand for the type of units or sites have long term phasing plans).
 - b) where a site has outline planning permission for major development, has been allocated in a development plan, has a grant of permission in principle, or is identified on a brownfield register, it should only be considered deliverable where there is clear evidence that housing completions will begin on site within five years.
- 2.2 The Council has undertaken an assessment of all housing sites (both those that are currently committed and those with potential) within the Strategic Housing Land Availability Assessment 2025 (SHLAA).
- 2.3 The SHLAA details all sites within the Borough that had a planning commitment at 1 April 2025 (i.e. those sites that were under construction, had an extant planning permission or were allocated for residential purposes). In addition, the SHLAA identifies other sites within the Borough that had potential for residential development over the plan period.
- 2.4 Each site was assessed to determine whether it would deliver any residential development in the next five years and the estimated numbers that were likely to be delivered within that period. Only sites that were considered to meet the NPPF definition of deliverability set out above were identified as having the potential to deliver housing within the next five years. Although there is potential for other identified sites to come forward within the next five years, the NPPF definition has been adhered to. Additional unidentified sites may also come forward as windfalls, however no allowance has been made over the next five years.
- 2.5 Appendix 1 contains a list of all those sites within the SHLAA database that the Council considers will deliver new housing units within the rolling five-year period (i.e. 1 April 2025 to 31 March 2030).

Deliverability of PfE Allocations

- 2.6 The trajectories for the Places for Everyone Allocations are indicative, based on delivery across multiple outlets at a rate of around 50-55 dwellings per annum per outlet in most cases, increasing to 70 per annum where the development will be delivered at higher density.
- 2.7 Evidence was submitted by the site promoters as part of the Places for Everyone Examination to indicate that the sites will come forward within the first 5 years of the plan period. The site promoters were also asked for input into the indicative

trajectories for their sites as part of the 2025 SHLAA update - the promoters for Simister Bowlee and Elton have responded to the request.

- 2.8 JPA1.1: Residential development within Bury is a small component of this allocation, and engagement with the developer of this part of the site indicates they are seeking to progress the site at pace. First completions have been assumed for 2027/28, and a total of 80 dwellings have been included within the five year supply from this allocation.
- 2.9 JPA1.2: Simister and Bowlee: In their response to a request for an update, the site promoters have indicated that the first completions will be in 2028/29, and a total of 90 dwellings will be completed within the next five years. A masterplan is being prepared for this site.
- 2.10 JPA7: Elton Reservoir: In their response to the request for an update Peel Land Group have suggested first completions in 2027/28. A total of 290 dwellings have been included within the 5 year supply from this allocation. A masterplan is being prepared for this site.
- 2.11 JPA9: Walshaw: The consortium have not responded to a request for an updated trajectory, however a masterplan is being prepared for the site and an outline application has been submitted for up to 275 units on part of the site. A total of 210 dwellings have been included in the five year supply for this site, with first completions assumed for 2028/29.

Housing Trajectory

- 2.12 The SHLAA database provided a detailed assessment of the amount of housing that each site is expected to deliver each year, as set out in the housing trajectory below (Figure 1).

Figure 1 Housing Trajectory

2.13 The envisaged housing trajectory shows that 911 units are expected to be delivered on sites under construction, 631 units on sites with planning permission, 19 dwellings on other sites and 670 dwellings on Places for Everyone Allocations (excluding the brownfield element of JPA8 Seedfield) within Bury over the next five years (2025-2030). This equates to a total of **2,231** dwellings and average completion rate of 446 dwellings per annum over the next five years.

2.14 The SHLAA has robustly assessed the sites that currently have a planning commitment and has made realistic assumptions on the delivery of these sites (including sufficient lead in times where appropriate and annual build rates). It has also made realistic assumptions on the delivery of sites that are emerging.

3 Housing Target

Places for Everyone Housing Target

- 3.1 Places for Everyone Policy JP-H1 sets the following stepped housing targets for Bury over the plan period:

Table 1: Phasing of new dwellings 2022-2039

-	Annual average 2022-2039	2022-2025 (annual)	2025-2030 (annual)	2030- 2039 (annual)	Total 2022- 2039
Bury	452	246	452	520	7,678

- 3.2 Although Places for Everyone is a joint plan of nine districts, Policy JP-H1 is clear that where national policy requires a local planning authority to identify and update annually a supply of specific deliverable sites in their district, this will be assessed against the minimum delivery rates for the district set out in Table 7.2 of the plan, irrespective of any shortfalls or surpluses in other districts and in the Plan area overall (unless national policy requires a different figure to be used).

Applying a Buffer

- 3.3 The NPPF sets out that where a local planning authority is required to demonstrate and update annually a supply of specific deliverable sites, a buffer is to be applied to the deliverable housing land supply (moved forward from later in the plan period) of 20% where there has been significant under delivery of housing over the previous three years.
- 3.4 'Significant under delivery' will be measured against the Housing Delivery Test, where this indicates that delivery was below 85% of the housing requirement.

Housing Delivery Test

- 3.5 The NPPF introduces the Housing Delivery Test (HDT), which is a measure of net additional dwellings delivered against the number of homes required, using a rolling three year period. The Secretary of State will publish the Housing Delivery Test results for each local authority in England annually. The latest measurements for 2023 were published in December 2024.
- 3.6 The latest published HDT results are calculated as set out in Table 1. The latest published figures consider the delivery and housing need over the period from 2020-2023. The PfE plan period starts in 2022, therefore the PfE requirement applies to 2022-23, and the local housing need figures (LHN) based on the standard method at that time using the 2014-based projections and the affordability information that was available in that year apply to 2020-2022.
- 3.7 In order to reflect the national disruption caused to housing delivery by the pandemic to starts and completions, construction, and monitoring of completions, the period for measuring the homes required in 2020/21 has been reduced by 4 months. As 'homes required' data can be calculated by the day, the 2020/21 'homes required' measurement period has been reduced by a total of 122 days.

Table 2 - Housing Delivery Test 2023

Year	Source of housing requirement figure	Number of homes required	Number of homes delivered
2020/21	LHN based on 2014-based 2020-2030 projections, 2019 affordability ratio (reduced by 4 months due to Covid)	400	229
2021/22	LHN based on 2014-based 2021-2031 projections, 2020 affordability ratio	591	289
2022/23	PfE target for 2022/23	246	280
TOTAL		1,237	798
	Housing Delivery Test Assessment	$\frac{798}{1,237} \times 100 =$	64%

3.8 The 2023 published HDT equates to 64%.

Past delivery

- 3.9 National Planning Practice Guidance sets out that any past shortfall in housing delivery from the base date of the adopted plan should be added to the plan requirements for the next 5 year period, then the appropriate buffer should be applied. Where areas deliver more completions than required, the additional supply can be used to offset any shortfalls against requirements from previous years.
- 3.10 The base date of the Places for Everyone Plan is 2022. Therefore completions in 2022/23 and 2023/24 should be taken into account when calculating whether there has been any past shortfall or over-supply against planned requirements.
- 3.11 In 2022/23 there were 280 net housing completions in Bury against a PfE target of 246, which results in an over-supply of 34 dwellings. In 2023/24 there were 244 net housing completions against a PfE target of 246, resulting in an under-supply of 2 units. In 2024/25 there were a total of 312 net housing completions against a PfE target of 246, which results in an over-supply of 66 units. Therefore from 2022-2025, 98 more units have been delivered than required.

Housing Target

3.12 The housing target for 2025-2030 is as set out below:

	Annual PfE requirement	Total requirement	Total requirement (including past over-supply allowance)
2025-2030	452	2,260	2,260
Past over / under delivery	-	-	-98
20% buffer		452	432
Total 5YS requirement		2,712	2,594
Annual 5YS requirement		542	519

3.13 Applying a 20% buffer to the five year requirement increases the total five year target to 2,712 dwellings. Accounting for the over and under supply in 2022 - 2025 would reduce this to **2,594 dwellings**.

4 Five Year Supply Calculations

- 4.1 To determine whether the five year supply requirement can be met, the amount of envisaged supply is divided by the annual five year supply requirement (which includes the appropriate buffer). The level of housing supply is generally measured in 'number of years'.
- 4.2 Table 4 provides a summary of the five year supply calculations:

Table 5 - Five year supply

	Total requirement	Total requirement (including past over supply allowance)
Total requirement over 5 years including 20% buffer	2,712	2,594
Annual 5YS requirement including buffer	542	519
Supply 2025-2030	2,231	2,231
Years Supply¹	4.1 years supply	4.3 years supply

¹ Five year supply divided by annual 5YS requirement.

Appendix 1 – Available units on sites deliverable within 5 years

Category 1: Under Construction

Site ref.	Address	Cat. ²	Application number	Description	Deliverability comments	Y1	Y2	Y3	Y4	Y5	5 year total
HL/2004/00	11 Bury Road, Radcliffe	1	62315	COU to 5 apartments on 1st floor, extension on 2nd floor to form 3 apartment	The site has planning permission and is under construction.	0	8	0	0	0	8
HL/2148/00	Former Radcliffe High School, School Street, Radcliffe	1	69233	90 dwellings	The site is has planning permission, is under construction and will deliver housing within the next five years.	25	35	30	0	0	90
HL/2157/00	Hutchinson Way/Hindle Street, Radcliffe	1	64199	9 dwellings	The site has planning permission and is expected to deliver in the next five years. Part of the site has been completed.	0	4	0	0	0	4
HL/2241/00	Former Police Station, Irwell Street, Bury	1	70565	Full app for specialist care home and outline app for Care Home (C2)	The first care home is under construction. Capacity is based on national ratio of 1.8. It is expected that the completion of the outline part of the site will exceed the five year period.	22	0	0	0	0	22
HL/2249/00	Land Adjacent to 1 Ribchester Drive, Bury	1	68251	Construction of 4no. semi-detached houses with new access	The site has planning permission and is under construction.	2	2	0	0	0	4
HL/2286/00	Land adjacent Metro, Heys Road, Prestwich	1	67431	18 apartments	The site has planning permission and is under construction.	12	6	0	0	0	18
HL/2297/00	Land at Springside Road (Christchurch Playing Fields), Bury	1	68055	41 dwellings	The site has planning permission and is under construction.	20	21	0	0	0	41
HL/2303/00	Tetrosyl Site, Bevis Green Works, Walmersley Old Road, Bury	1	63533	268 Dwellings with access, car parking, landscaping and open space	The site has planning permission and is under construction.	40	45	45	36	0	166
HL/2311/00	Windacre Works, Mather Road, Bury, BL9 6RB	1	64651	Demolition of existing mill and erection of 4 dwellings	The site is suitable, available and has the potential to deliver housing in the short term to medium. The first unit is under construction.	1	1	2	0	0	4

² Category 1 = Under construction

Site ref.	Address	Cat. ²	Application number	Description	Deliverability comments	Y1	Y2	Y3	Y4	Y5	5 year total
HL/2338/00	Land at Bury Road/York Street, Radcliffe, Manchester, M26 2WH	1	68368	Full planning permission for 211 dwellings,	The site has planning permission and is under construction.	90	36	0	0	0	126
