

Bury Strategic Housing
Land Availability
Assessment (2024)

March 2025

Important Notice - Disclaimer

In relation to the information contained within this report (and any other report relating to the findings of Bury's Strategic Housing Land Availability Assessment - SHLAA), the Council makes the following disclaimer, without prejudice:

The identification of potential housing sites, buildings or areas within the SHLAA does not imply that the Council would necessarily grant planning permission for residential development. All planning applications incorporating residential development will continue to be treated against the appropriate development plan and material planning considerations. For example, some of the sites identified in the SHLAA are currently being used for employment purposes and any planning application to change the use of these sites to residential would be assessed against planning policy that seeks to protect employment land and other material planning considerations;

The inclusion of potential housing sites, buildings or areas within the study does not preclude them from being developed for other purposes. For example, many of the sites identified are still in employment use and the redevelopment of these for further employment use would generally be considered appropriate;

The boundaries that are attached to sites, buildings and areas are based on the information available at the time. The SHLAA does not limit an extension or contraction of these boundaries for the purposes of a planning application;

The exclusion of sites, buildings or areas from the study (either because they were never identified or are identified as 'constrained potential' or have been 'discounted') does not preclude the possibility of planning permission for residential development being granted on them or for these sites to be allocated. It is acknowledged that sites will continue to come forward (particularly small sites) that will be suitable for residential development that have not been specifically identified in the SHLAA;

The categorisation of sites in terms of when they may come forward (short, medium or long term) is based on information held at the base date of the study (1 April 2024). Circumstances or assumptions may change which may mean that sites could come forward sooner or later than originally envisaged. The SHLAA does not prevent planning applications being submitted on any sites identified or excluded within it at any time;

The information that accompanies the SHLAA is based on information that was available at the time of the study and there may be some omissions and/or factual inaccuracies which the Council does not take liability for. Therefore, users of the SHLAA findings will need to appreciate that there may be additional constraints on some sites that were not identified at the time of the survey and that planning applications will continue to be treated on their own merits at the time of the planning application rather than on the information contained within this assessment. Likewise, some of the identified constraints may have been removed since the information was compiled. Issues may arise during the course of a detailed planning application that could not / were not foreseen at the time of the study. For example, the SHLAA may identify a site as having no contamination but detailed ground investigations in the preparation of a planning application may reveal that it has. Applicants are therefore advised to carry out their own analysis of sites to identify any constraints or other information for the

purposes of a planning application and not rely solely on the findings of the SHLAA;

The capacity identified on the sites either relates to the numbers granted within a planning permission (where applicable) or is an estimate based on an appropriate density for the site in question. In arriving at these densities, Officers have taken into account locational and sustainability factors along with issues around local character and general views on the site. However, the capacities identified do not preclude densities being increased on sites, subject to details. Nor does it mean that the densities envisaged within the assessment would be appropriate and these would need to be assessed through the normal planning process when submitting a planning application.

The study has a base date of 1st April 2024 and the findings are only a 'snapshot' of information held at that time. Therefore, some of the information held on the database will be subject to change over time. For example, sites that are identified as not having planning permission may have secured permission since the information was compiled, whilst planning permissions may have lapsed on other sites. The assessment of sites in the SHLAA does not take into account the December 2024 changes to NPPF. The Council intends to use the SHLAA as a 'living document' that will be continuously updated with a comprehensive overall update each year.

1 Introduction

- 1.1 The National Planning Policy Framework (NPPF) sets out the national policy direction for the delivery of housing through the planning system. One key objective of the Government is to significantly boost the supply of homes. The NPPF requires strategic policies to make sufficient provision for housing development, looking ahead over a minimum of 15 years from adoption. It seeks to make effective use of land by making as much use as possible of land that has been previously developed, including land and buildings that are vacant or derelict.
- 1.2 Paragraph 72 of the NPPF states that strategic policy-making authorities should have a clear understanding of the land available in their area through the preparation of a Strategic Housing Land Availability Assessment (SHLAA). From this, planning policies should identify a sufficient supply and mix of sites, taking into account their availability, suitability and economic viability.
- 1.3 The National Planning Practice Guidance (PPG) states that SHLAAs should provide an assessment of land which is suitable, available and achievable over the plan period. To meet this objective, authorities should identify specific sites and broad locations that will enable continuous delivery of housing over the Local Plan period.
- 1.4 As set out in NPPF paragraph 78 local planning authorities should identify and update annually a supply of specific deliverable sites sufficient to provide a minimum of five years' worth of housing against their housing requirement set out in adopted strategic policies, or against their local housing need where the strategic policies are more than five years old (unless they have been reviewed and found not to require updating). The supply of specific deliverable sites should in addition include a buffer (moved forward from later in the plan period) of:
 - a) 5% to ensure choice and competition in the market for land; or
 - b) 20% where there has been significant under delivery of housing over the previous three years, to improve the prospect of achieving the planned supply.
- 1.5 SHLAA's are expected to form a key component of the evidence base to support the delivery of housing to meet adopted housing targets, which for Bury have been set through the Joint Places for Everyone Development Plan document (PfE).
- 1.6 It is important to note (as outlined in the disclaimer to this report) that whilst the SHLAA is an important evidence source to help inform the plan-making process, it will not in itself determine whether a site should be allocated for housing development or whether planning permission would be granted for residential development.
- 1.7 This summary report sets out how Bury's SHLAA has been carried out and presents the findings of the assessment.

2 Background

2.1 Bury's SHLAA will form part of the evidence base on the Borough's supply against local housing requirements. In line with the NPPG, SHLAAs should:

- Identify sites and broad locations with potential for development;
- Assess their development potential; and
- Assess their development potential and the likelihood of development coming forward (the availability and achievability).

2.2 The results of the SHLAA can then be used to:

- help an authority to identify how much housing can be delivered within an area;
- show whether or not housing targets can be delivered over the plan period (or at least in the short to medium term);
- demonstrate a continuous, flexible and responsive supply of housing can be provided;
- provide some comfort to the housebuilding industry about the suitability of sites with housing potential;
- provide an evidence base for the decision making process and help to inform other development plan documents; and
- help inform other initiatives and strategies that may be undertaken by the Council and other bodies (e.g. Development Briefs, Infrastructure Plans).

2.3 The assessment has drawn upon a range of technical evidence sources that either had already been produced or were/are currently being undertaken to support Places for Everyone and the Bury Local Plan.

3 Methodology

3.1 The National Planning Practice Guidance (PPG) sets out the methodology for the assessment of land availability as illustrated in Figure 1. The SHLAA has been carried out in line with this methodology.

Figure 1: Methodology – Flow Chart

Please note that the flowchart above is taken from the National Planning Practice Guidance (NPPG) and may not be suitable for users of assistive technology. Please see the link on the [NPPG webpage](#) to request an accessible format if required.

Stage 1 – Identification of Sites and Broad Locations

3.2 This stage is split into four areas as follows:

- A. Determine assessment area and site size;
- B. Desktop review of existing information;
- C. Call for sites/broad locations; and
- D. Site / broad location survey.

A. Determine Site Assessment Area and Site Size

- 3.3 The national planning practice guidance advises that the area selected for the assessment should be the plan-making area. This could be the local planning authority area, 2 or more local authority areas, areas covered by a spatial development strategy, or areas covered by the Local Enterprise Partnership. There is a general agreement between the 10 Greater Manchester Council's that each district should undertake their own land availability assessments having regard to the national methodology. However, district data is collated at a Greater Manchester level and informed the Places for Everyone (PfE) Joint Development Plan.
- 3.4 Bury's urban area is tightly constrained by the Green Belt and both the Council and the Government attach great importance to Green Belt land. As such, the focus for previous SHLAAs has been within the urban area and this continues to be the case. The Places for Everyone Plan resulted in the release of strategic sites for residential development because it was not possible to identify sufficient housing land within the urban area.
- 3.5 Landowners and developers have put forward a significant number of sites outside of the urban area (including Green Belt) for development and these have been assessed in previous SHLAAs, and / or the Places for Everyone site selection process. The Council will continue to assess the suitability and achievability of all sites put forward regardless of the sites' location.
- 3.6 The NPPG suggests that SHLAAs should, at least, consider all sites and broad locations that have the opportunity to deliver five or more dwellings. Plan makers are allowed to consider other size thresholds where appropriate. As with previous SHLAAs, the Council does not impose a site size threshold as part of the assessment either in terms of the number of units or area size. Where small sites are known (e.g. if they have planning permission or have been put forward) they have been included in the SHLAA.
- 3.7 However, smaller sites that have potential for housing development are difficult to identify, particularly on a site specific exercise (e.g. most large properties would have the potential to be subdivided into additional units and there is scope to develop additional housing in garden areas or above existing retail units). Therefore, as it is difficult to assess such sites the SHLAA makes an allowance for such sites coming forward on an annual basis, based on past completion rates of such sites coming forward.

B. Desktop review of existing information

- 3.8 Previous SHLAAs have already been undertaken by the Council and this SHLAA is effectively an update of the last version. Much of the previous work can simply be rolled forward and updated without major modifications.
- 3.9 The findings of the SHLAA include an assessment of the following sources of sites that have potential for housing that are currently or have previously been identified through the planning process. Please note that the following sources relate to the position at 1 April 2024:
- Sites with an outstanding planning permission for residential development (or mixed-use with residential component) that are currently under construction;
 - Sites with an outstanding planning permission for residential development (or mixed-use with residential component) that are not under construction. This includes sites with either full or outline planning permission;
 - Sites that have been allocated for residential use in the Bury Unitary Development Plan and Places for Everyone Plan, which do not benefit from an extant planning consent;
 - Sites and/or areas identified in masterplans and regeneration frameworks which have the potential to include an element of residential development;
 - Sites and/or areas that are allocated (or have planning permission) for employment or other land uses which are no longer considered suitable for that use. For example, the findings of the Employment Land Review have helped to identify employment sites that are potentially no longer suitable for employment use or may have longer term redevelopment opportunities, which may involve an element of residential use; and
 - Sites that have benefited from planning permission previously but where the permission has lapsed.
- 3.10 In addition, the results of the SHLAA includes an assessment of other sites that are not within the planning arena but where there may be potential for residential development. These include:
- vacant and derelict previously developed land and buildings;
 - vacant land not previously developed;
 - underused land and buildings;
 - surplus public sector land; and
 - land in non-residential use (e.g. car parks, commercial buildings);
 - sites proposed through site suggestions / call for sites exercises.
- 3.11 For many years the urban area of Bury was tightly constrained by the Green Belt boundary and this restricted the ability of the Borough to deliver housing. The Places for Everyone Plan resulted in the release of strategic sites from the Green Belt for residential development because it was not possible to identify sufficient housing land within the urban area, and these sites are now included within the SHLAA supply. A large number of Green Belt sites are included in the SHLAA assessment as they have been put forward by landowners or developers as possible sites/areas for future development.

- 3.12 This latest review of the SHLAA builds on the results of the original SHLAA (and previous updates), which took account of a considerable amount of information relating to potential housing sites within the Borough. This included a range of past studies, land use surveys and GIS datasets that contained important information that has helped to assess the deliverability and developability of sites, including site constraints.
- 3.13 The Planning Team have worked closely with other Council services, including the Land and Property team, to help identify potential sites within the SHLAA. The Council is progressing a brownfield land development programme, and this fed into the SHLAA.
- 3.14 The availability of empty properties has been considered, however there are generally low levels of voids within the Borough, with rates comparable with other districts in the region. Whilst the Council is committed to reducing the number of empty properties by adopting a proactive approach in supporting owners to help return their empty properties to use, we have not identified any specific areas where long term voids are a particular problem or identified any potential opportunities for wider clearance / redevelopment programmes. In any event, the PPG sets out the empty homes brought back into use can only be included if they have not already been counted as part of the existing stock of dwellings to avoid double counting. This will be reviewed on an annual basis in the updates of the SHLAA.

C. Call for Sites/Broad Locations

- 3.15 The 2024 SHLAA is effectively an update of previous versions of the SHLAA and stakeholders have played an important role in identifying potential sites (including through masterplanning exercises) and influencing many of the assumptions contained in the SHLAA. These stakeholders include a range of public sector partners, housebuilders and site promoters, landowners and the local community, amongst others.
- 3.16 The Council undertook a comprehensive 'Site Suggestion Exercise' as part of the previous attempts to get an up to date Local Plan in 2007 and landowners and land promoters put forward a significant number of sites that fed into the SHLAA updates. This exercise invited all stakeholders on the Local Plan database and the public at large to put forward proposals on whether sites should be either protected or developed for other purposes. More recent Call for Sites were also carried out as part of the August 2017 Local Plan key issues and policy framework consultation and from 25 March to 6 May 2024 as part of the Bury Local Plan preparation process.
- 3.17 A call for sites exercise was also carried out as part of the preparation of the Greater Manchester Spatial Framework. Local residents, businesses, land owners and developers were invited to identify sites they think could be suitable for housing or employment development. Sites submitted for housing have fed into the SHLAA update.
- 3.18 The expertise and knowledge of stakeholders has been utilised and stakeholders have been able to give their views on the availability and deliverability of sites contained within the SHLAA. The assessment has been informed by market intelligence / knowledge of particular sites, and discussions with developers / agents, development management case officers and other Council Departments and public sector partners. Bury's SHLAA is

therefore considered to have been produced with full and continued involvement with appropriate partners and has been prepared in an open and transparent way to help it form a robust and credible part of the evidence base for the Local Plan.

- 3.19 Comments are welcome on the results of the SHLAA and we encourage all stakeholders to put forward any new sites that they consider could be brought forward for housing. Such comments and site suggestions can be submitted to the Council at any time throughout the year. An [online form](#) is available for stakeholders, including members of the public, to provide the relevant information needed to allow the Council to assess sites being suggested. All sites that are suggested to the Council are assessed as part of the annual update of the SHLAA.

D. Site / Broad Location Survey

- 3.20 The SHLAA survey has been carried out internally as sufficient expertise exists within the Council to identify potential housing sites through existing databases and local knowledge. Officers have undertaken a detailed assessment of all of the sites within the SHLAA against national policies and designations to establish which sites and locations have a reasonable potential for development.

- 3.21 The survey work sought to:

- bring together all the information available to enable Officers to assess the potential of each site;
- ratify any inconsistent information that was gathered through the call for sites process and the desktop survey;
- update information on each site, including those with planning permission;
- identify the most appropriate type and scale of development for each site;
- consider high level deliverability issues on each site, including how identified barriers could be overcome; and
- identify additional sites that had not been identified from other sources.

- 3.22 For each site the survey work identified:

- the site size, boundaries and location;
- the current land use and character;
- the land use and character of surrounding uses;
- any physical constraints on a site (e.g. access, contamination, steep slopes, flooding, location of infrastructure/utilities);
- potential environmental constraints;
- development progress (where applicable); and
- whether the site is considered to be suitable for a particular type of development or as part of a mixed use development.

- 3.23 The survey work is held within an Access database connected to the Council's GIS system. Sites will be continuously reviewed and the information within the SHLAA database will be formally updated on an annual basis, with a base date of 1 April through to 31 March. This annual review will determine if

there have been any changes in the sites identified (e.g. if a site has been granted planning permission or if a site has started development).

- 3.24 The SHLAA database collates all the relevant information needed to assess the potential of sites, associated constraints and particular opportunities within the sites. Much of this information on sites has already been obtained from work undertaken on the SHLAA in previous years.
- 3.25 Sites within the SHLAA have been visited in order to get an up-to-date view on development progress, particularly where sites have planning permission, and also to identify constraints to development. The Council has undertaken a review of all of the sites within the SHLAA to help determine the sites that have potential for future housing and those that have been discounted at this stage.

Stage 2 – Sites/Broad Location Assessment

- 3.26 The estimation of housing potential for each site identified in the SHLAA has been guided by existing and emerging planning policy, including emerging policies on density of development. This update of the SHLAA takes account of the proposed release of Green Belt land in the Places for Everyone joint plan (PfE) which has reached an advanced stage of the Examination. The sites that are proposed to be released are identified however until the Inspectors final report is received and the plan is adopted there is no guarantee that these sites will be allocated for development and removed from the Green Belt. The SHLAA is only a 'snapshot' of sites/proposals at a particular point in time.
- 3.27 The SHLAA seeks to ensure that appropriate densities are applied to the sites, based on location, particular site circumstances, opportunities or constraints in order to determine an indicative capacity for each site. For example, a higher density may have been deemed more appropriate in the most sustainable locations, including those within the main centres and along the main public transport nodes. Conversely, densities may have been reduced on some sites due to a potential detrimental impact on a feature of the natural or built environment (e.g. listed building).
- 3.28 In line with the NPPG, the Council has also sought to balance a site's potential with examples of similar sites that have come forward in a particular area or elsewhere within the Borough, where appropriate, along with existing densities nearby.
- 3.29 In line with NPPG guidance on counting housing provided for older people against housing requirements, for sites with communal facilities such as residential care homes for the elderly, in order to establish the amount of accommodation released in the housing market the capacity is based on the national average of 1.8 adults living in households. For example, a 40 bedroom care home would equate to 22 units within the SHLAA (i.e. $40 \div 1.8 = 22$).
- 3.30 The results of the SHLAA seek to provide evidence to support the Council's position in relation to the requirements of national planning guidance, in terms of both identifying a deliverable housing supply in the short term and also potential sites for the next ten years and beyond. In line with the NPPG methodology, the Council has assessed the availability, suitability and

achievability of identified sites to determine if overall they can be considered to be deliverable or developable.

- 3.31 In order for a site to be considered within the deliverable housing land supply (five year supply), the site or at least part of it, must be considered to be deliverable. The NPPF definition of deliverability requires sites to be available now, offer a suitable location for development now, and be achievable with a realistic prospect that housing will be delivered on the site within five years. Sites that are not major development, and sites with detailed planning permission, should be considered deliverable until permission expires, unless there is clear evidence that homes will not be delivered within five years. Sites with outline planning permission for major development, allocated in a development plan, permission in principle or identified on a brownfield land register should only be considered deliverable where there is clear evidence that housing completions will begin on site within five years.
- 3.32 In assessing the suitability of a site for housing the Council has examined each site against;
- local and national planning policy;
 - physical problems or limitations (e.g. access or flood risk issues);
 - potential impacts of a site being released for residential use (including potential impacts upon landscape features, nature and heritage conservation);
 - appropriateness and likely market attractiveness;
 - contribution to regeneration priorities; and
 - the living conditions / amenity impacts that would be experienced by prospective residents and neighbouring areas.
- 3.33 The findings of the SHLAA have followed the NPPG guidance that considers that the sites that are allocated or have planning permission for residential use, will generally be considered suitable. However, each site has been assessed individually (including those with planning permissions and are allocated) to determine if they remain suitable since permission was granted or since they were allocated.
- 3.34 In assessing the availability of sites for housing, the Council has assessed land ownership constraints that may be associated with bringing sites forward. This has included identifying whether there are any obvious legal or ownership problems, including ransom strips or multiple ownership issues. However, it should be noted that the Council has not identified the ownership of every site within the SHLAA as this was considered too costly an exercise to do and information could quickly become outdated. It was not considered proportionate to do this.
- 3.35 Instead, the findings of the SHLAA are based on information held within various datasets and local knowledge, where available (e.g. through Acolaid from planning applications or through evidence submitted from the site suggestion exercise). The consultations on previous SHLAAs have provided a further opportunity for developers and landowners to provide information on whether the sites were available for development.
- 3.36 One of the main reasons for assessing the availability of sites is to identify whether sites are likely to come forward within a five year period (deliverability criteria). Many of the sites that have been put forward by

landowners and developers suggest that sites may be available in the longer term (i.e. beyond five years). These sites have not been considered as being 'deliverable' in the SHLAA in the sense that they would not contribute to the supply of short term deliverable sites. However, they may actually be available in the sense that they are not in use. Other sites have been put forward by landowners as being immediately available but are not currently deemed suitable (e.g. due to policy constraints).

- 3.37 In assessing the achievability for housing, the Council sought to identify whether there was a reasonable prospect that housing would be developed on particular sites/areas at a particular point in time. This part of the assessment included an analysis of the general viability of bringing sites forward, which involved looking generally at:
- market factors;
 - cost factors, including infrastructure;
 - viability issues; and
 - other delivery factors.
- 3.38 It should be noted that the Council does not have the resources to assess detailed viability of each individual site. However, some high level viability work has been carried out as part of the evidence base for Places for Everyone. This suggests that residential development sites in Bury are largely viable, although there may be challenges in lower value areas of the Borough.
- 3.39 Each site within the SHLAA has been assessed on when residential development is likely to be 'achieved'. This assessment also relates back to policy issues at the national and local level. The results of the SHLAA indicates the amount of units that are likely to be delivered on sites/areas (or partial sites/areas) within the short term (years 0-5, which is 2024/25 to 2028/29), medium term (years 6-10, which is 2029/30 to 2033/34) or longer term (looking up to 2042 - the proposed end date of the Local Plan).
- 3.40 The results have also enabled the SHLAA to produce a more detailed assessment of the housing numbers that will be produced by specific sites/areas each year up to 2042. This information has been used to produce the Housing Trajectory which will be included in the Authorities Monitoring Report. The housing trajectory is broken down by the amount of housing land that is expected to be delivered on brownfield and greenfield sites.
- 3.41 Sites have only been considered to be deliverable (in terms of the five year supply) if the site is deemed to be suitable, available and achievable.
- 3.42 The guidance in NPPG suggests that the SHLAA should consider how any identified constraints could be removed to help sites to come forward. Accordingly, the SHLAA has identified possible ways in which constraints can be removed, where possible, and the Council is committed to continuing to work with appropriate agencies and stakeholders to help identify how other constraints can be overcome on sites that have development potential. It should be noted that many of the constraints identified relates to planning policies and designations (e.g. Green Belt constraints).
- 3.43 The Council has previously identified some broad areas where future housing will be encouraged as part of mixed use redevelopments. Plans have now

been drawn up or are progressing for these areas to help progress their redevelopment. These include the Radcliffe SRF, Prestwich Village Regeneration Scheme, Bury Town Centre Masterplan and Millgate Regeneration Framework. As a result, where possible the SHLAA has been updated to identify specific sites within these areas and take account of emerging evidence of the development potential from these areas. As work progresses on this front the SHLAA will be updated to take account of any changes to the development potential from these areas (as well as any other sites coming forward).

Stage 3 – Windfall Assessment

- 3.44 Windfall sites are defined in the NPPF as “Sites not specifically identified in the development plan.”
- 3.45 The NPPF and PPG make reference to an allowance for windfalls for housing (where justified). Paragraph 75 of the NPPF states that “Where an allowance is to be made for windfall sites as part of anticipated supply, there should be compelling evidence that they will provide a reliable source of supply. Any allowance should be realistic having regard to the strategic housing land availability assessment, historic windfall delivery rates and expected future trends”.
- 3.46 Windfall sites include sites that have unexpectedly become available and have subsequently been identified as having potential. Local authorities have traditionally made ‘allowances’ for windfall sites when demonstrating the supply of land in their areas, to reflect the fact that sites continually come forward despite not being specifically allocated in the local development plan or being identified as part of the supply within supply studies, such as the SHLAA. These allowances are generally based on the average number of completions on windfalls sites over a number of years, allowing for fluctuations.
- 3.47 For the purpose of this report, windfall sites are considered to be sites that are not specifically identified as part of the housing land supply (i.e. Category 1-4) within the SHLAA. The Council considers that such sites will continue to come forward over the plan period.
- 3.48 In particular, the Council considers that it is appropriate to make an allowance for small windfalls coming forward as it is difficult to identify small sites that have potential for residential development. Historical analysis of recent completions indicates that windfalls continue to come forward on small sites. Findings of the windfall assessment are set out in Section 5 of this report.

Stage 4 – Assessment Review

- 3.49 The national planning practice guidance states that once sites have been assessed, the development potential of them can be collected to produce an indicative trajectory. This should set out how much housing can be provided, and at what point in the future. These outputs are set out in this report, identifying the level of housing that could potentially be delivered over the coming years. Delivery rate and lead-in time assumptions vary depending on

the nature of the site, the type of development and whether there are likely to be multiple outlets.

Stage 5 – Final Evidence Base

3.50 Section 6 provides a summary of the results of the SHLAA, including a trajectory of anticipated delivery. Additional details are then provided on each site identifying (amongst other key outputs):

- a list of all sites and broad locations assessed;
- a plan showing the location of these sites;
- a detailed assessment of each site (including their suitability, availability and achievability);
- an assessment of when sites are likely to come forward;
- details of why sites have either been deemed suitable or discounted;
- the potential type and quantity of development that could be delivered on each site;
- the envisaged build out rates for each site; and
- any barriers to site delivery and setting out how these may be overcome.

4 Findings

- 4.1 The sites within the SHLAA are split into different categories depending on their planning status and their assessment within the SHLAA. There are six different categories in total as follows:
- SHLAA housing land supply:
 - Category 1 – Sites under construction;
 - Category 2 – Sites with extant planning permissions (full, outline and prior approval and Permission in Principle);
 - Category 3 – UDP Allocations;
 - Category 4 – Unconstrained potential;
 - Category 6 – Places for Everyone Site Allocations;
 - Constrained and discounted sites (do not form part of the housing land supply):
 - Category 5 – Constrained potential; and
 - Category 7 – Discounted Sites.
- 4.2 All sites and broad locations are assessed and placed within one of the above categories, with the assessment then determining how many homes are likely to be delivered on each site (if any) and when. This information then feeds into the housing trajectory to determine the short and long term housing potential across the Borough.
- 4.3 The tables below identify which period each SHLAA site is expected to start to deliver housing. Please note that some of the larger sites will deliver housing numbers in more than one period. The Housing Trajectory in Section 7 considers the envisaged annual completion rates on all SHLAA sites.

Category 1 – Sites Under Construction

- 4.4 As stated, sites that are given a category 1 status are those sites that have received planning permission and a material start has been made on the implementation of that planning permission. Within this category there will be sites at various different stages in the construction process from sites that are nearing completion to sites that are just commencing ground works.
- 4.5 As with all the different categories, these findings are based on the position at the 1 April 2024 and some of these sites may have been completed since then or additional sites may have commenced. These changes will be picked up in the comprehensive yearly review of the SHLAA.
- 4.6 The summary table of each of the categories identifies the number of sites within that category, the total site area and the number of units that are available on them. It also identifies the availability of the sites within the three timeframes. However, it should be noted that large sites may be identified as coming forward within one timeframe but will also contribute to the housing numbers in other timeframes. The number of dwellings is based on when completions are likely to take place.

Table 1 – Category 1 – Sites under construction

Availability	Number of Sites	Site Area	Available and Under Construction
2024-2029	65	39.24	915
2029-2034	3	0.22	16
2034-2039	2	0.38	5
2039-2042	0	0	0
2042+	1*	1.62	0
Total	71	41.46	936

* Site ref. HL/0219/00 – Eagle Bleachworks, is identified as Category 1 because it has an extant planning permission for 144 dwellings because a material start was made, but the development is not expected to progress within the plan period and the site has therefore been assigned a capacity of 0 dwellings.

4.7 The figures in Table 1 show that there were 936 units available on 71 sites that were under construction at 1 April 2024. Of these, 404 units (44%) were actually under construction with the remaining 532 yet to start on these sites.

Category 2 – Sites with an Extant Planning Permission

4.8 Category 2 sites are those sites that had an extant planning permission for residential development, including outline and full permission, at 1 April 2024. Some of these sites may have progressed to Category 1 status since then and any change in status will be taken into account in the next annual review.

Table 2 – Category 2 – Sites with planning permission

Availability	Number of Sites*	Site Area	Available
2024-2029	119	53.60	677
2029-2034	6	1.95	303
2034-2039	0	0.00	0
2039-2042	0	0.00	0
2042+	0	0.00	0
Total	125	55.55	980

* Please note that sites are categorised on the basis on when they are likely to first deliver housing but that the delivery of some sites will span more than one 5-year period. The number of dwellings is based on when individual completions are likely to occur.

4.9 The figures in Table 2 show that 125 sites had an extant planning permission at 1 April 2024 with the ability to deliver 980 units (net) over the plan period.

Category 3 – Housing Allocations

- 4.10 Category 3 sites are those sites that have been specifically allocated for residential purposes within the Bury Unitary Development Plan 1997 (UDP). Most of the sites allocated in the UDP have already come forward and there are only four remaining that have not come forward for various reasons.

Table 3 – Category 3 – Housing Allocations

Availability	Number of Sites	Site Area	Available
2024-2029	0	0.00	0
2029-2034	0	0.00	0
2034-2039	2	2.54	75
2039-2042	0	0	0
2042+	2	0.78	0
Total	4	3.32	75

- 4.11 The figures in Table 3 show that there are a potential 75 units that could be accommodated on the remaining housing allocations in the UDP. These have been assessed as being sites that are likely to come forward in the medium to long term in the plan period but they all have the potential to be delivered in the short term if brought forward. Site ref. HL/0289/01 – land to rear of Church Lane, Prestwich is no longer expected to come forward for residential development and has therefore been assigned a capacity of 0 dwellings. One site, HL/1581/00 – Land west of 457 Tottington Road, Bury is within the proposed Walshaw Places for Everyone allocation. The capacity of the site is included within the Walshaw Places for Everyone SHLAA record (HL/2848/00), therefore HL/1581/00 has been assigned a capacity of 0 and included with the 2042+ timeframe to avoid double counting.

Category 4 – Unconstrained Potential

- 4.12 Category 4 sites are those sites that have been identified as being suitable for residential development in the future but do not as yet have any current planning commitments (i.e. do not have an extant planning permission or are allocated for residential use). Please note that the term 'unconstrained' relates to the sites general suitability rather than deliverability. Therefore, some of the sites in this category may have some development constraints that will need to be considered and resolved before they can receive planning permission and be developed.

Table 4 – Category 4 – Unconstrained potential

Availability	Number of Sites*	Site Area	Available
2024-2029	13	16.55	652
2029-2034	37	18.83	1,322
2034-2039	13	4.87	656
2039-2042	0	0.00	76
2042+	0	0.00	0
Total	63	40.24	2,706

* Please note that sites are categorised on the basis on when they are likely to first deliver housing but that the delivery of some sites will span more than one 5-year period. Dwelling numbers are based on when it is anticipated that units will be completed.

- 4.13 The figures in Table 4 show that there is considerable housing potential for around 2,706 units on 63 sites. These sites have been identified as coming forward at various points of the Local Plan period but there would be no policy restrictions on preventing these coming forward in the short term.

Category 6 – Places for Everyone Site Allocations

- 4.14 Category 6 sites are those sites that have been allocated in the Adopted Places for Everyone Joint Development plan as allocations for residential development, or mixed use development incorporating an element of housing.

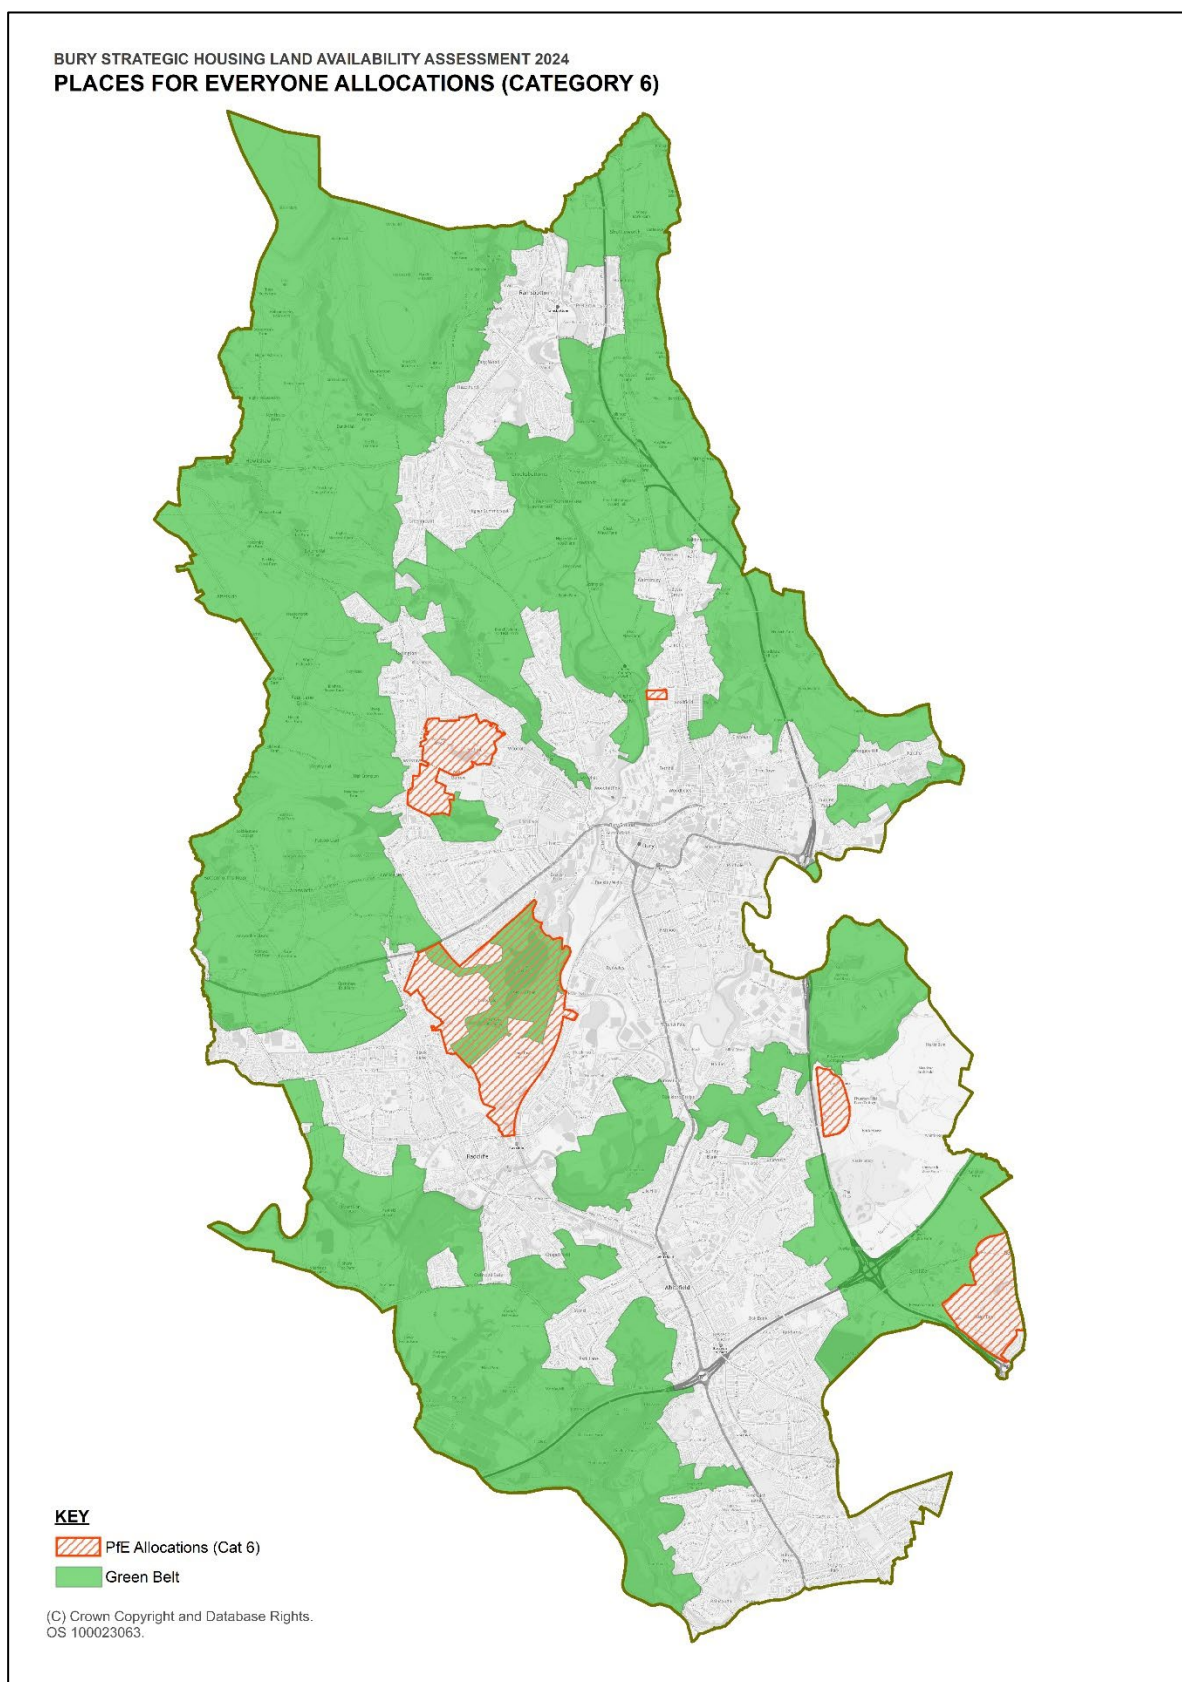

Table 5 – Category 6 – PfE allocations

Availability	Number of Sites*	Site Area	Available
2024-2029	4	409.73	580
2029-2034	0	0.00	2,265
2034-2039	1	2.21	1,859
2039-2042	0	0.00	460
2042+	0	0.00	1,190
Total	5	411.94	6,354

- 4.15 HL/2518/00 – Seedfield is identified as a PfE allocation but has been split into 2 separate records because part of the site has been granted planning permission, so part of the site is included within Category 2 as a separate record (HL/2518/01).
- 4.16 It is anticipated that not all of the dwellings on the Elton Reservoir allocation would be delivered within the PfE plan period of 2022-2039 or the anticipated Bury Local Plan period to 2042.
- 4.17 Figure 2 shows the location of the Places for Everyone site allocations. The plan only includes part of the Seedfield site, because the remainder has

planning permission, and the Castle Road part of the JPA1.1 Heywood Pilsworth allocation.

Figure 2: Places for Everyone Site Allocations

Category 5 – Constrained Potential

- 4.18 Category 5 sites are those sites that have been identified as having some potential to deliver housing but are currently constrained (e.g. have physical or planning policy constraints). As above, the term 'constrained' relates to the sites suitability rather than the sites deliverability. Table 6 identifies the potential from these sites if the identified in-principle constraints could be removed.
- 4.19 Many of the sites in this category are employment sites that have been put forward by landowners but have been identified as being suitable for continued employment use in the Employment Land Review (unlike the employment sites identified in category 4, which are no longer deemed suitable). Some of these sites may deliver housing over the plan period, if some of the constraints can be removed (e.g. if large employment sites are redeveloped as mixed use developments incorporating an element of residential).

Table 6 – Category 5 – Constrained potential

Availability	Number of Sites	Site Area	Available
Total	106	86.11	2,720

- 4.20 The figures in Table 5 show that the potential from constrained sites is considerable. However, whilst some of these sites may come forward as 'windfalls' over the plan period, many are likely to remain in their current use.

Category 7 – Discounted Sites

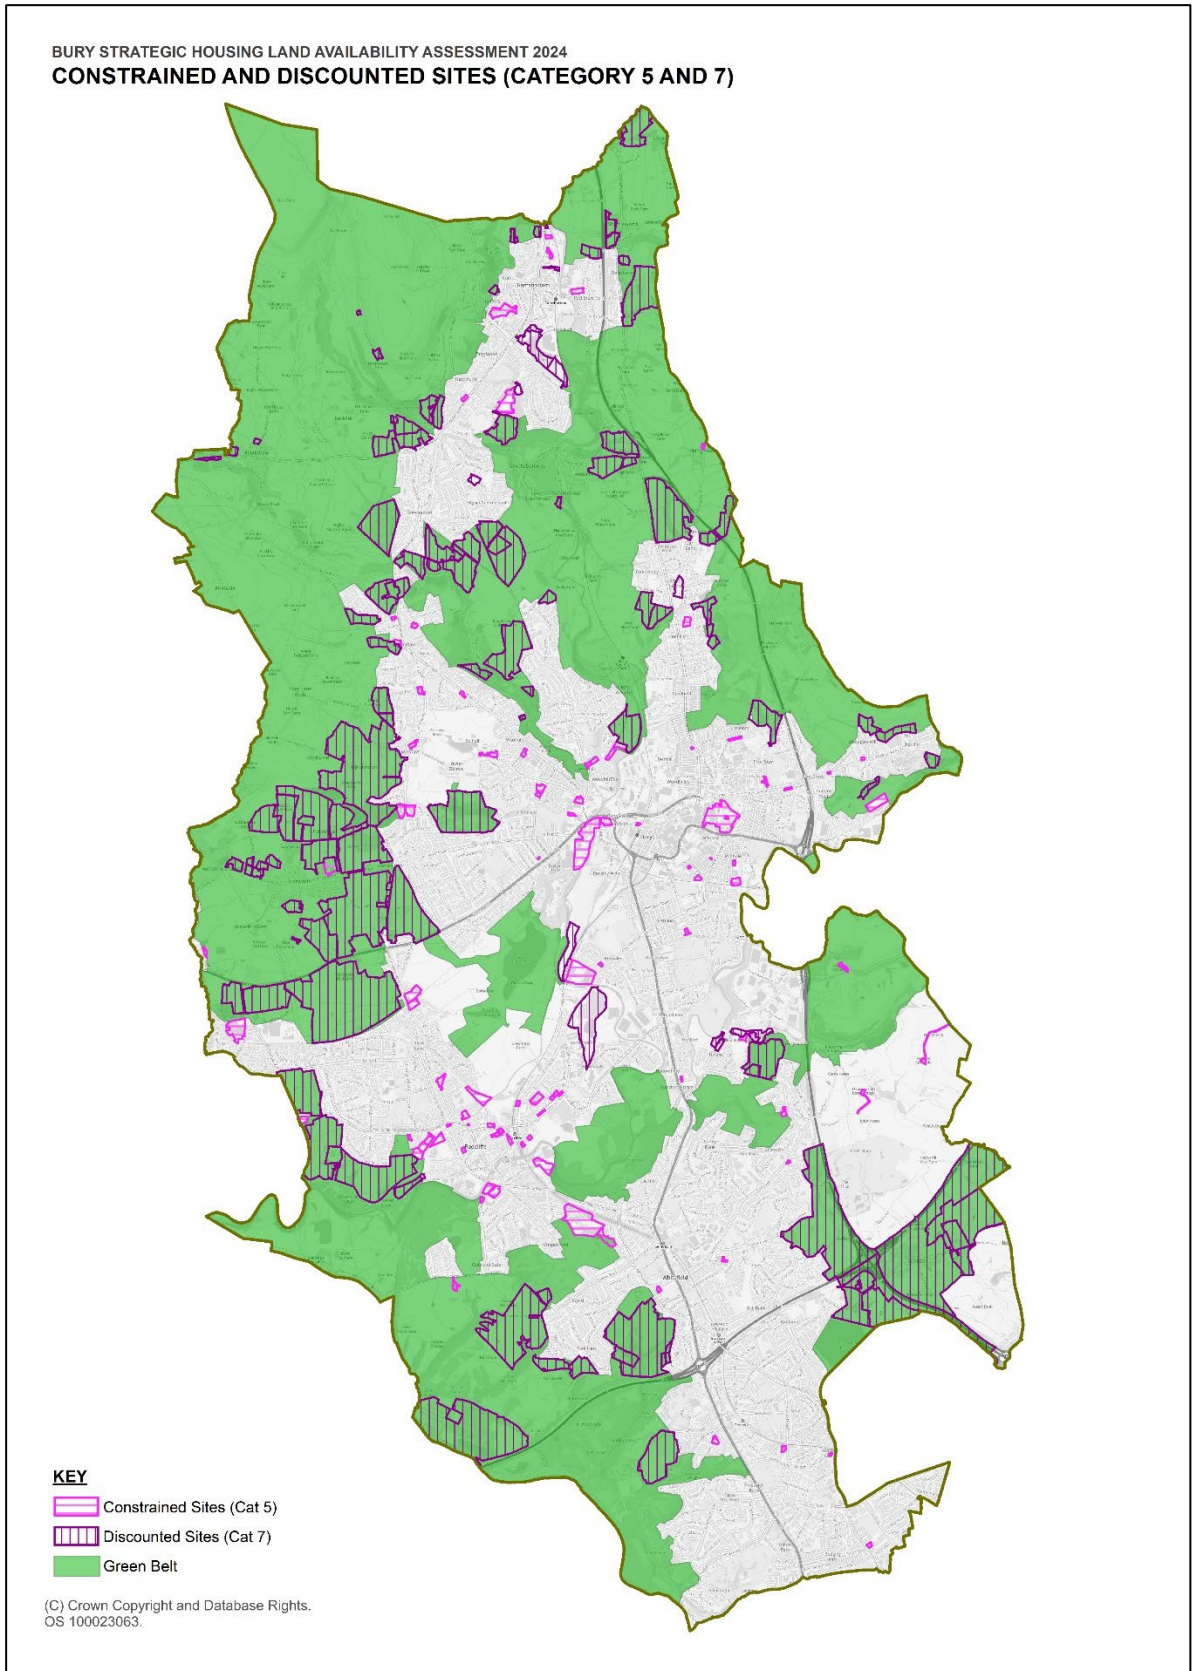

- 4.21 Category 7 sites are those sites that were assessed as part of the SHLAA but are not considered to be suitable for housing at this time because of site and/or planning policy constraints (e.g. some sites are large greenfield sites in unsustainable locations in the Green Belt). Some of these sites may contribute to housing over the plan period if the issues that warranted their discounted status can be removed (e.g. if very special circumstances can be demonstrated on a Green Belt site).

Table 7 – Category 7 – Discounted sites

Availability	Number of Sites	Site Area	Capacity
Total	112	1,251.41	28,732

- 4.22 The figures in Table 7 show that there is potential on 112 discounted sites to accommodate around 28,732 units. However, at this time these sites are not considered to be suitable for residential development given the existing constraints on the sites. Reviews of the SHLAA will continue to assess the longer term potential of Category 7 sites as Planning Policy evolves, site circumstances change or if there are changes in terms of the national or sub-regional approach to delivering housing. Appendix 4 gives a brief outline of why the Category 7 sites have been discounted.
- 4.23 Figure 3 shows the location of the constrained and discounted sites (Category 5 and Category 7).

Figure 3: Constrained and Discounted Sites

5 Windfall Allowances

- 5.1 Windfall sites are defined in the NPPF as “Sites not specifically identified in the development plan”. Local authorities have traditionally made ‘allowances’ for windfall sites when demonstrating the supply of land in their areas, to reflect the fact that sites continually come forward despite not being specifically allocated in the local development plan or being identified as part of the supply within supply studies, such as the SHLAA. These allowances are generally based on the average number of completions on windfalls sites over a number of years, allowing for fluctuations.
- 5.2 The NPPF states that local planning authorities may make such an allowance for windfalls if there is compelling evidence that such sites will provide a reliable source of supply. It goes on to state that any allowance should be realistic having regard to the SHLAA, historic windfall delivery rates and expected future trends. For the purposes of this report, windfall sites are considered to be sites that are not specifically identified as part of the SHLAA supply.
- 5.3 The Council considers that sites that have not been specifically identified in the SHLAA as having potential to deliver housing will continue to come forward through the plan period. The NPPF also states that local planning authorities to support the development of windfall sites through their policies and decisions, giving great weight to the benefits of using suitable sites within existing settlements for homes. It is therefore likely that windfall sites will continue to play an important role in meeting future housing need in Bury. As such, the Council intends to make an appropriate allowance for windfalls coming forward over the plan period in line with the NPPF.

Windfall allowance for small sites

- 5.4 The Council considers that it is particularly difficult to identify which small sites are likely to come forward over the plan period and for these sites to be specifically identified in the SHLAA. The Council does not have the resources to identify and assess every parcel of land which may have potential for only 1 or 2 dwellings. It is envisaged that planning applications will continue to be submitted over the plan period for additional dwellings through:
- the subdivision of existing dwellings;
 - flats over existing shops;
 - the intensification of existing residential areas (e.g. developments in garage colonies); and
 - other small housing sites coming forward.
- 5.5 There is no nationally set methodology for establishing what an appropriate small sites windfall allowance would be and no set definition of what would constitute a small site. Analysis has been carried out applying a threshold of less than 5 dwellings, as sites of this scale are the hardest to identify.

Table 8 – Small sites completions – completions on sites less than 5 dwellings

Year	Gross	Net
2019/20	39	34
2020/21	48	36
2021/22	41	35
2022/23	26	23
2023/24	44	38
TOTAL	198	166
Average	40	33

- 5.6 There are no reasons to suggest that there will not continue to be a significant contribution to housing delivery made by smaller sites that have not specifically been identified as being suitable in the SHLAA due to the size of the site.
- 5.7 It is considered appropriate to apply a small sites allowance from 2029/30 onwards. Many small sites that are likely to come forward earlier will already have planning permission and so will be included within the SHLAA. Although it is likely that additional small windfall sites will come forward within the next five years, a conservative approach has been taken to apply the windfall allowance from year 6 (2029/30). The use of net figures builds in an allowance for small sites clearances and changes of use from housing to other uses.
- 5.8 The figures presented in Table 9 are based on total past net completion rates. It is therefore appropriate to deduct any small sites that are currently included within the SHLAA from the allowance to avoid double counting. The results of this approach are set out in Table 9.

Table 9 - Small sites windfall allowance

Year	Small sites annual average past takeup	Small sites SHLAA supply	Small sites allowance
2029/30	33	11	22
2030/31	33	10	23
2031/32	33	8	25
2032/33	33	5	28
2033/34	33	2	31
2034/35	33	2	31
2035/36	33	3	30
2036/37	33	0	33
2037/38	33	0	33
2038/39	33	0	33
2039/40	33	0	33
2040/41	33	0	33
2041/42	33	0	33
Total	429	41	388

- 5.9 The small sites windfall allowance varies slightly from year to year, based on how many dwellings within the existing supply are deducted. As set out in Table 9, a small sites windfall allowance of **388 dwellings** will be added to the identified baseline land supply from 2029 to 2042.

Large Windfall Sites

- 5.10 Larger sites are easier to identify than small sites and the SHLAA identifies a number of large sites that have potential to deliver housing in the short, medium and longer term. These range from sites that have already got planning permission or are currently under construction to those larger sites that are still in use but are likely to become available over the plan period.
- 5.11 Nevertheless, it is important to note that the SHLAA is only a snapshot picture of potential sites at a particular point in time. The assumptions used in the assessment can change over time, including changes to national planning policies and guidance. The availability of sites can also change over relatively short periods of time and large sites that were not considered to have any potential can quickly become available due to unforeseen circumstances.
- 5.12 Therefore the Council considers that, in addition to small sites, it is likely that large sites will also come forward for residential development over the plan period that have not specifically been identified as being suitable in the SHLAA. This may include sites that are currently identified as having constrained potential or discounted sites, which may be considered suitable for residential use if the identified constraints can be overcome.
- 5.13 The SHLAA has identified several large sites (1 hectare or above) that are currently considered to be constrained and as such have not been considered suitable for residential use at this time (Category 5 - constrained potential). Several of these sites are employment sites that are deemed to be suitable for continued employment use. The constraints on some of these sites may be resolved over the plan period, which may allow some of these sites to deliver housing over the plan period. For example, it may be acceptable for certain large employment sites to be redeveloped through a mixed use scheme which incorporates an element of residential use, as well as employment use.
- 5.14 In addition, there are a number of businesses currently located in older premises or where they have no room to expand, who may choose to relocate to more suitable modern premises. The allocation of land for employment within PfE will create opportunities for these businesses to relocate thereby freeing up less suitable employment sites for residential redevelopment.
- 5.15 However, no large windfall allowance is included due to lack of evidence to demonstrate what an appropriate allowance would be or certainty over whether past trends are likely to continue, as many of the sites that are least suitable for continued employment use have already been lost or incorporated within the SHLAA.

Dwelling Losses

- 5.16 It is considered that windfall allowances should also take account of historic losses of dwellings in areas and future clearance programmes. In terms of trend data, Table 10 gives a breakdown of net dwelling losses in each of the last five years (this includes demolitions and the loss of dwellings to other uses).

Table 10 - Dwelling losses

Year	Total
2019/20	5
2020/21	12
2021/22	6
2022/23	3
2023/24	16
TOTAL	42
Average	8

- 5.17 There has not been a great deal of clearance activity in Bury when compared with clearance programmes in other local authorities across the region. All but 5 of the dwelling losses above were on small sites of less than 5 dwellings, and have therefore been taken into account in using a net past trend figure to calculate the small sites windfall allowance. There are no plans for further comprehensive clearance programmes in the Borough given the relatively good condition of the existing housing stock but it is acknowledged that there may be some small scale clearances over the plan period. The likelihood is that any cleared sites will go on to be redeveloped for housing and have a limited impact on overall housing supply. The figures for specific sites identified in the SHLAA as part of the housing land supply are also net of any losses, so these do not need to be accounted for separately.

Local windfall allowance

- 5.18 Whilst the Council believes that windfall sites will continue to come forward each year over the plan period, it is not proposed that a windfall allowance is made for the next five years of the plan period (i.e. no allowance is proposed for years 2024/25 to 2028/29). Whilst sites are likely to come forward and secure planning permission over this five year period, they may not deliver housing straight away. The housing trajectory, therefore, assumes that housing from windfalls (i.e. sites that are not currently identified in categories 1-4) will start to deliver housing in 2029/30.
- 5.19 Based on historical windfall trends and the likelihood of these continuing, the Council makes a conservative windfall allowance of a total of 388 units from 2029/30 to 2041/42. This is based on small sites. No specific allowance has been made for large windfalls at this time, due to the difficulty of establishing what would constitute an appropriate allowance, although these are likely to continue to come forward. This may include sites that are currently identified as category 5 and 7 (as evidence shows some of the sites that have been identified in these categories have subsequently come forward) as well as sites that have not been identified at all within the SHLAA.

6 Summary of Findings

6.1 In total, there were 268 sites within categories 1 to 4 and category 6 providing potential for 10,249 residential units over the period from 2024-2042 residential units. Table 11 sets out the summary of these categories along with the windfall allowance. Category 5 and 7 sites are not shown on the summary table as they are either constrained or discounted. Category 6 Places for Everyone site allocations are now included because the plan was adopted in March 2024.

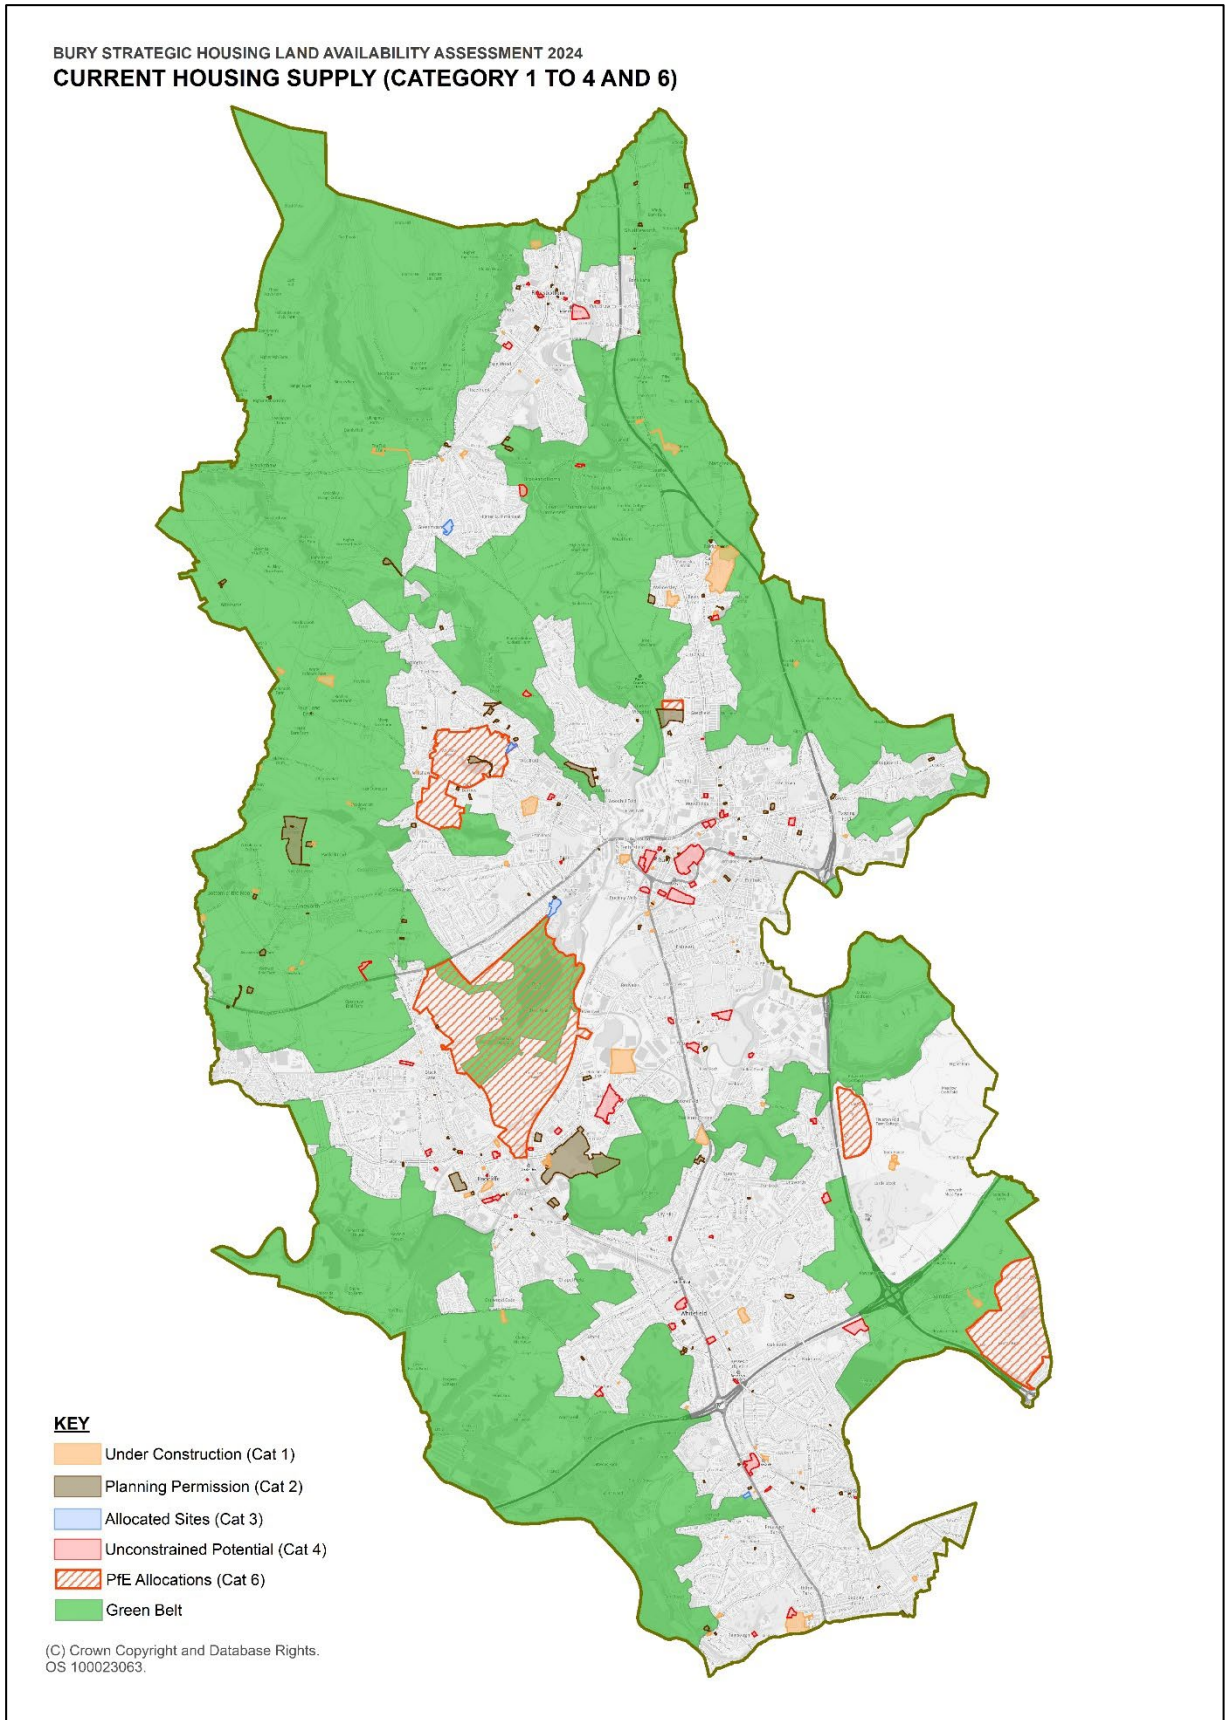

Table 11 – Summary of findings

Source of Supply /Potential	2024-2029	2029-2034	2034-2039	2039-2042	TOTAL
Units on sites Under Construction	915	16	5	0	936
Units on sites with Planning Permission	677	303	0	0	980
Outstanding UDP Allocations	0	0	75	0	75
Unconstrained Potential	652	1322	656	76	2,706
PfE Allocations	580	2265	1859	460	5,164
Windfall Allowance	0	129	160	99	388
Total Number of Potential Units Identified in the SHLAA	2,824	4,035	2,755	635	10,249

6.2 The results of the SHLAA show that there is considerable potential for a significant amount of residential development within the Borough between now and the end of the plan period (i.e. up to March 2042). There is the potential to accommodate 9,861 units on 268 identified sites across the Borough, with a further conservative estimate of 388 units to come forward on unidentified windfall sites over the plan period. A further 1,190 units are expected to come forward on PfE Allocations after 2042.

6.3 Figure 4 shows the location of all of the sites included in the current housing land supply.

Figure 4: Current Housing Land Supply

7 Analysis of Findings

7.1 This section of the summary report provides some information on house completions in recent years and examines the envisaged completion rates up to 2041/42 (i.e. over the intended Bury Local Plan period). It also sets out the broad locations where identified sites are located and illustrates how these relate to neighbourhood areas.

Recent Completions

7.2 Figure 5 provides information on the number of housing completions (net) over the past 20 years.

Figure 5: Net completions in Bury

7.3 The figures in Figure 5 show that there was a net gain of 6,987 units over the past 26 years, equating to an average annual completion rate of 349 dwellings. This average has been somewhat skewed by the above average completion rates in 2004/05 to 2005/06, where there were 1,633 net completions, equating to an average of 816 dwellings per annum. The high completion rates in these years reflected the peak of the housing market and the redevelopment of some of the Borough's redundant large employment sites.

7.4 The average completion rate in the past five years has been 245 dwellings per annum.

Housing Trajectory

7.5 The SHLAA database provides a detailed assessment of the amount of housing that each site is expected to deliver on an annual basis up to March 2042. This is quite a difficult exercise considering the timeframes involved and the uncertainty around the availability / deliverability of many of the sites, together with the dynamics of the development industry. Sites that are either currently under construction or have an extant planning permission are much easier to make yearly completion assumptions on compared to sites

that may be identified as becoming available towards the end of the plan period.

7.6 Nevertheless, the Housing Trajectory provides a good illustration of the expected annual completion rates up to 2041/42.

Figure 6 – Housing trajectory

7.7 The trajectory illustrates that there is expected to be an increase in the annual average completion rate over the next five years (2024/25 to 2028/29) with 2,824 completions over this period compared to 1,227 over

the past 5 years. This equates to an annual average of 565 over the next five years and primarily reflects the assumed delivery of sites that are either currently under construction or have an extant planning permission (with detailed permission for major developments), together with other identified sites where there is clear evidence that they will come forward within the next five years. The other identified sites that are expected to come forward within the next five years include sites that secured planning permission after 31 March 2024, sites which are being brought forward as part of the Council's brownfield housing delivery programme and the early phases development on the sites allocated through the Places for Everyone plan.

- 7.8 The NPPF definition of 'deliverable' within five years states that sites with outline planning permission, permission in principle, allocated in the development plan or identified on a brownfield register should only be considered deliverable where there is clear evidence that housing completions will begin on site within five years. This definition has been strictly applied to sites within the first five years, however it is likely that some of the sites that have been identified from year 6 onwards could come forward sooner (i.e. within the next five years).
- 7.9 The trajectory indicates that a further 6,790 dwellings are expected to be delivered from 2029 to 2039, including 289 windfalls, with a further 635 units from 2039-2042. These dwellings are expected to be delivered on large sites that already have planning permission together with those sites that are identified as being suitable for residential development (i.e. category 4 sites) and allocated through the Places for Everyone plan (i.e. category 6).

Previously Developed Land

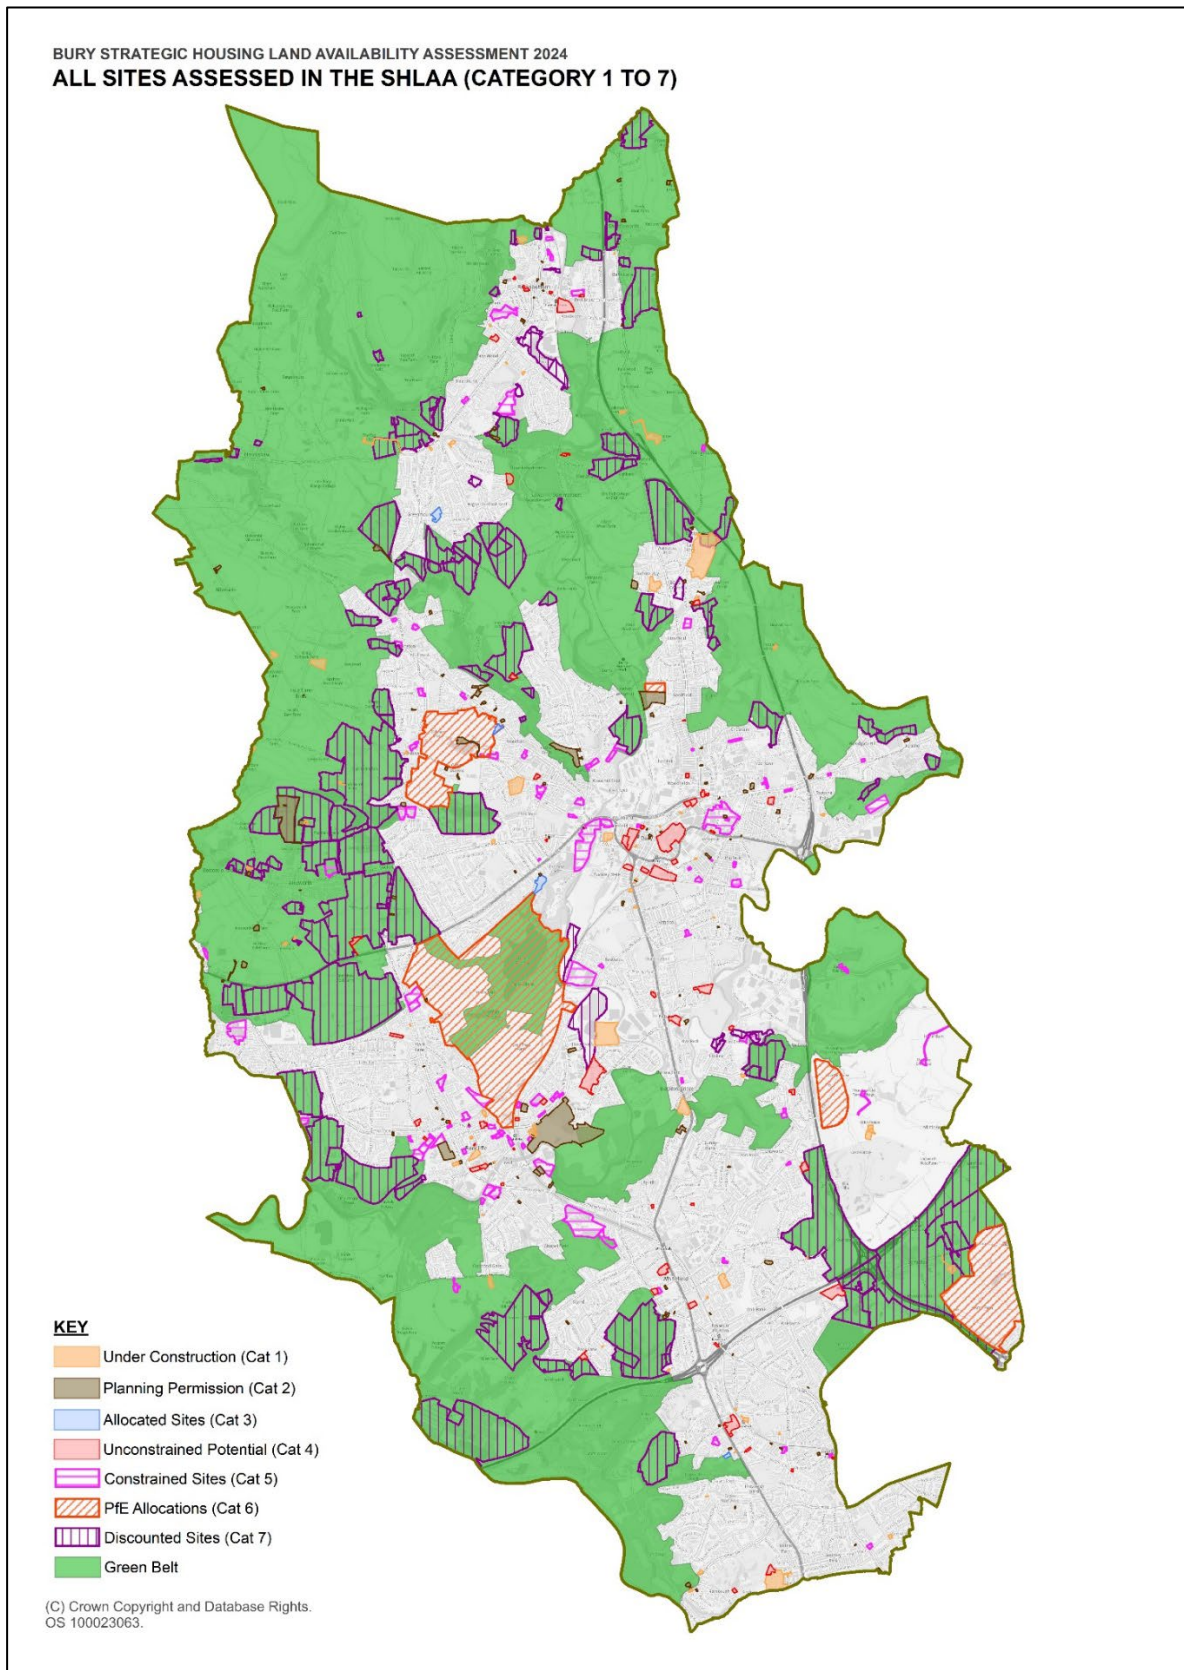

- 7.10 The findings show that there are 268 sites identified within the SHLAA housing supply, which have a capacity to provide for 9,861 dwellings (excluding windfalls). 4,313 units (44%) are on previously developed land. 52% (5,164 units) are on sites allocated through Places for Everyone (excluding units already granted planning permission). 75 units are on sites allocated through the Bury Unitary Development Plan, and a further 309 units are on unallocated greenfield land.

Location of SHLAA Sites

- 7.11 Figure 7 sets out the location of every site identified within the SHLAA, including those sites that are considered to be constrained and discounted.
- 7.12 It is clear to see that the vast majority of sites in the categories 1 to 4 are located within the urban area. The plan shows that there is a particularly heavy concentration of potential housing sites in and around the inner areas of both Radcliffe and Bury. The majority of category 5 sites are also within the urban area.
- 7.13 The Places for Everyone Site Allocations are located on land released from the Green Belt in Bury and Radcliffe and around Junction 18 of the M60/M62 and to the east of the M66.
- 7.14 The majority of sites that have been discounted in the SHLAA (Category 7) are located outside the urban area, mainly within the Green Belt. There is a particularly heavy concentration of discounted sites in the Green Belt area

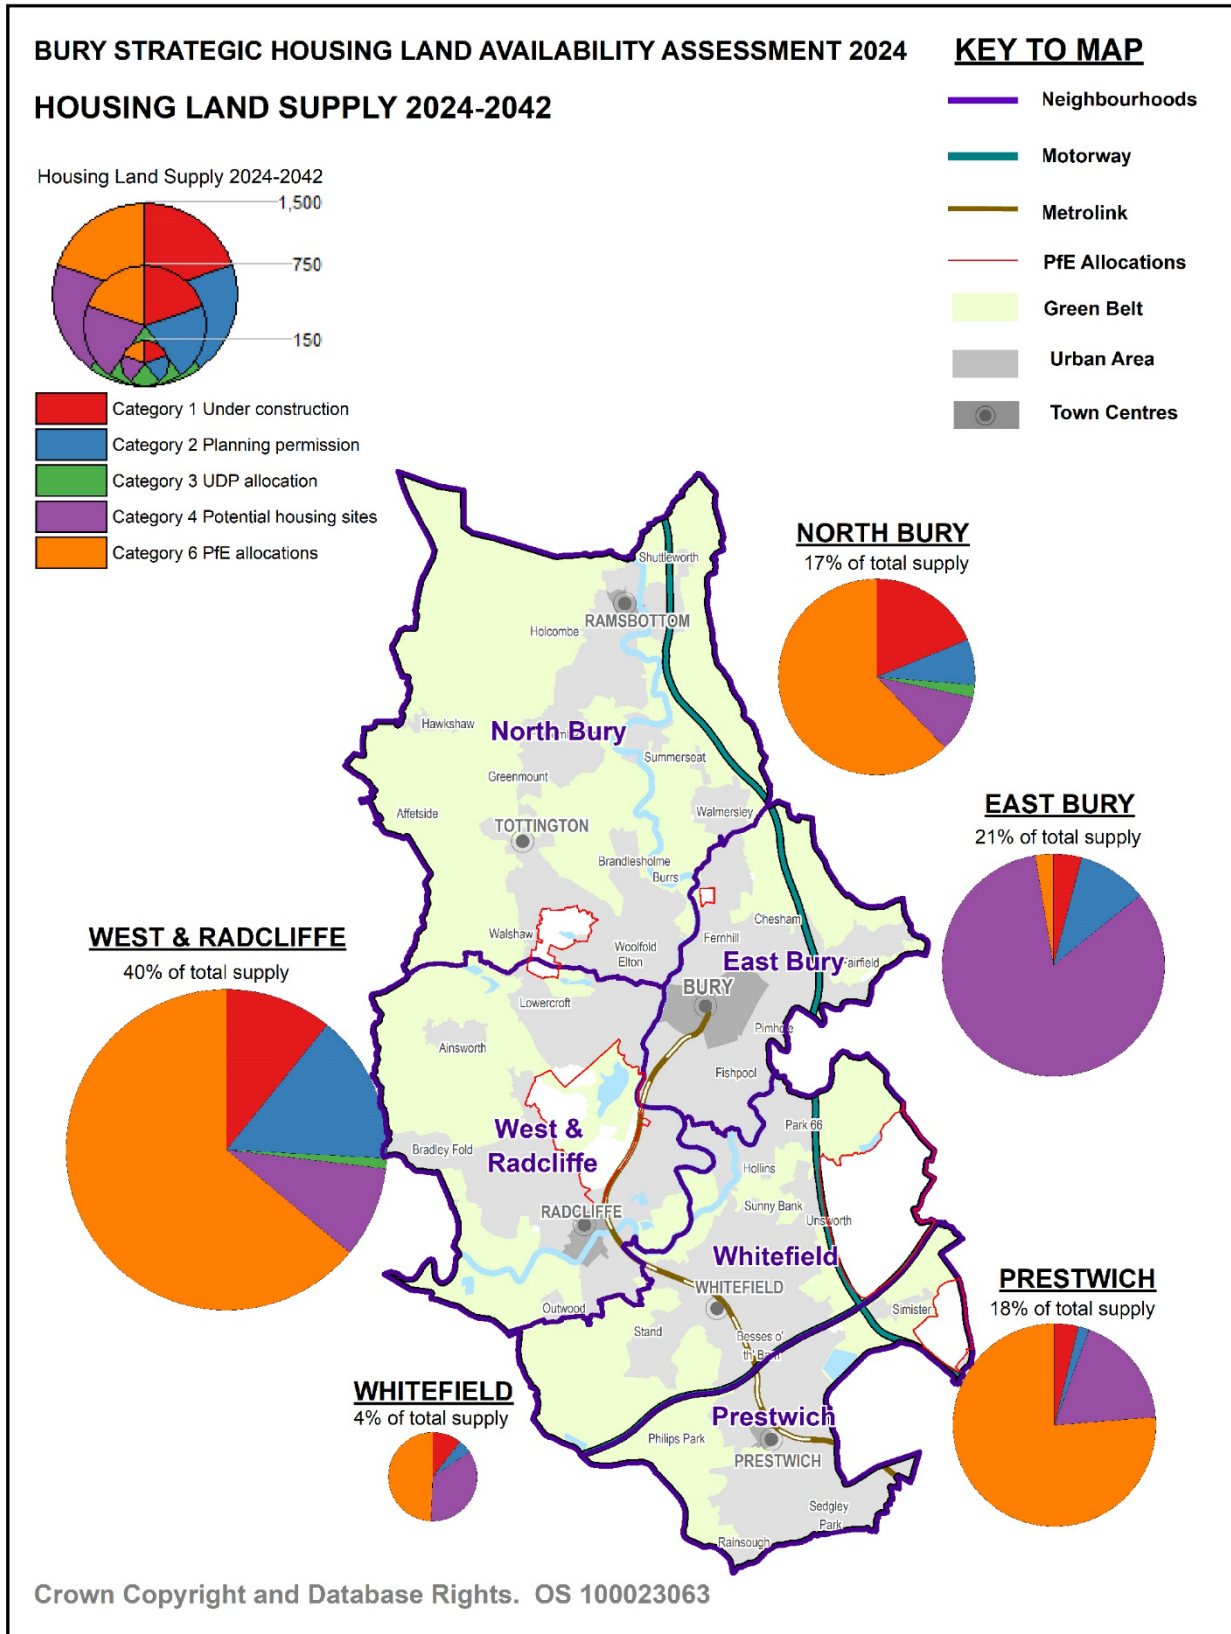

running from Radcliffe up to Tottington, as well as around the M60/M62 junction.

Figure 7: Location of all sites assessed in the 2024 SHLAA

7.15 Figure 8 identifies how the identified supply translates across each of the Borough's five Neighbourhood areas. Where Places for Everyone Allocations cross neighbourhood boundaries, they have been incorporated within each area based on high level estimates of areas of development land and are subject to change.

Figure 8 – Split of SHLAA sites between neighbourhood areas

7.16 This illustrates that 40% of the supply is in the West and Radcliffe neighbourhood. Just over 75% of the supply in Prestwich is from PfE Allocations. Most of the supply in East Bury is on Category 4 Potential housing sites – the majority of these are within Bury Town Centre on Council-led sites. Whitefield has the least housing supply (but does include the Places for Everyone Heywood Pilsworth site allocation).

7.17 Table 9 shows the actual number of dwellings that can be accommodated in each of the five neighbourhood areas, as indicated in Figure 8.

Table 8 – Housing supply 2024-2042 split by area

Neighbourhood area	Category 1 Under construction	Category 2 Planning Permission	Category 3 Outstanding UDP Allocation	Category 4 Unconstrained Potential	Category 6 PfE Allocations	Total
North Bury	315	126	35	157	1,042	1,675
West and Radcliffe	425	593	40	362	2,518	3,938
East Bury	85	210	0	1,723	54	2,072
Whitefield	43	20	0	142	200	405
Prestwich	68	31	0	322	1,350	1,771
Total	936	980	75	2,706	5,164¹	9,861

7.18 Please note that the above figures do not include an allowance for windfalls. Given the nature of windfalls, it is difficult to predict where they will be located.

¹ Excludes units already granted planning permission. A further 1,190 units are expected to come forward after 2042, with a total capacity on PfE Allocations of 6,354 (excluding dwellings at Seedfield already granted planning permission). Where Places for Everyone Allocations cross neighbourhood boundaries they have been incorporated within each area based on high level estimates of areas of development land and are subject to change.

Conclusion

- 7.19 This summary document provides a snapshot picture of both the committed and potential housing supply in the Borough up to 2041/42 at 1 April 2024. The results of the SHLAA will primarily be used to help inform work on the Bury Local Plan. In particular, it will play an important role in providing robust and credible evidence to demonstrate that the proposed housing target for the Borough can be delivered.
- 7.20 The sites and areas that have been identified in the SHLAA database are derived from a number of sources and are reviewed on an annual basis. The SHLAA has been carried out in full accordance with the NPPG.
- 7.21 There will be continuous opportunities for stakeholders to be involved in the SHLAA, providing additional information on sites or suggesting new sites as the SHLAA is rolled forward year on year. Certain assumptions have been made within the assessment based on current policy and guidance and Officer's professional judgement at a certain point at time. However, as the SHLAA is a 'living document', the information and assumptions are subject to change over short periods of time, as sites move from one category to another, or as circumstances change on sites and as new sites come forward, for example.
- 7.22 Planning applications for residential development will continue to be assessed on their individual planning merits in accordance with the development plan and other material planning considerations. Information that is contained within the SHLAA may act as a useful indication of opportunities or constraints on a site but applicants will still need to undertake their own detailed research to determine the full potential for residential development opportunities on sites within the SHLAA or indeed those that have not been identified.
- 7.23 It is clear from the findings in Section 4 and the analysis in Section 7 that there is potential for a considerable amount of residential development on previously developed sites within the urban area. In total, 268 sites have been identified as having potential to deliver 9,861 housing units from 2024-2042. An allowance for an additional 388 windfall units from 2029/30 to 2041/42 has been made to take account of the potential from small sites that have been unable to be identified at this stage.
- 7.24 The SHLAA also identified 106 category 5 sites that had the potential to provide for 2,720 units if they were able to overcome the identified constraints. An additional 112 sites were assessed in the SHLAA but were discounted because of the constraints that existed on the sites. These had the potential to deliver 28,732 units and includes a number of large sites within the Green Belt.
- 7.25 These results will help form part of the Council's evidence base to support the preparation of Bury's Local Plan and to demonstrate the Council's position in relation to the requirements of national planning guidance, in terms of both identifying a deliverable housing land supply in the short term and also identifying potential housing sites for the period beyond this (to cover the period of Bury's Local Plan).

- 7.26 The full SHLAA report, including details of all the sites, is available to view on the Council's website.
- 7.27 Appendix 2 provides some brief details of all the sites that have been assessed as part of the SHLAA. Appendix 3 provides a summary of the reasons why the Council considers the Category 5 sites to be constrained. Appendix 4 provides a summary of the reasons why the Council considers that Category 7 sites should be discounted.

Appendix 1 – Glossary of Site Information in SHLAA

For those wishing to view the SHLAA Report in more detail it is available to view online at www.bury.gov.uk/11050. Each of the sites assessed are clearly mapped out within this folder and more detail is provided on the sites, including information relating to its location and identifiable constraints. Those wishing to view the detailed SHLAA folder may find the following Glossary useful to help understand the information that is presented on each site.

Site Details

Field	Description
Site Reference	Each site is given a unique Housing Land (HL) reference number.
Category	Each site is given a category depending on where the site is at within the planning process as follows: Cat 1 – Sites under construction Cat 2 – Sites with an Extant Planning Permission Cat 3 – Sites Allocated for Housing Cat 4 – Unconstrained Potential (sites considered suitable for residential use) Cat 5 – Constrained Potential (sites where residential use is considered unsuitable unless the constraints can be overcome) Cat 6 – Proposed Places for Everyone Allocations (sites identified in the submitted Places for Everyone (August 2021) as allocations for residential development or mixed use incorporating an element of housing) Cat 7 – Discounted Potential (primarily undeveloped Green Belt sites where there are significant planning constraints that are likely to prevent sites from coming forward over plan period)
Site Location	Address of the site in question
Sub-District	Each site is identified on the basis of the particular sub-district that it is located. The sub-districts are Ramsbottom, Tottington, Bury North, Bury South, Radcliffe, Whitefield and Prestwich.
Existing Use	The existing planning land use of the site (such as residential, employment, retail etc)
Surrounding Use	The predominant land uses surrounding the site
Land Use Class	The land use categories are as follows: BU – Brownfield Urban BNU – Brownfield Non-Urban GU – Greenfield Urban GNU – Greenfield Non-Urban MU – Mixed Urban MNU – Mixed Non-Urban U/K – Unknown
Site Area (ha)	The size of the site measured in hectares
Density	This is calculated on the number of dwellings per hectare (based on the estimated net site area).

Field	Description
Previously Developed?	Whether the site is previously developed or not (i.e. Greenfield or brownfield)
Windfall Site?	<p>Whether the site is a windfall site (i.e. the site has not been allocated for identified for residential development through the Local Plan).</p> <p>No – Site is a housing allocation Y-S – Site is a small windfall site (<0.39) Y-M – Site is a medium windfall site (0.4 – 0.99 ha) Y-L – Site is a large windfall site (>1 ha)</p>
Capacity	<p>Number of units that the site can accommodate.</p> <p>The Council has identified the number of units available on sites within categories 1 and 2 based on information submitted as part of the relevant planning application.</p> <p>Sites and areas identified in categories 3 and 4 have been assessed to determine the potential housing that could be accommodated in them, taking on board information available at the time, such as location and the likely density of developments, or capacities of expired consents.</p> <p>Sites and areas in categories 5 and 7 have simply been attributed a density of circa 30 dwellings per hectare to determine their potential capacity unless other information was available. However, the net developable area may be much smaller on some of these sites and the capacity of the sites may be reduced considerably even if the sites came forward.</p> <p>Please note the capacity estimates in categories 3 to 7 are for indicative purposes only and the actual number of units developed on a site may go up or down.</p>

Application Details (where applicable)

Field	Description
Application Number	The planning application number. In the event that there is more than 1 approval on the site the Council has used the latest approval or if in Category 1, the approval that is being implemented.
Description	Site description of what the planning approval is for.
Planning Status	This lists any planning status that is associated with a site (such as full / outline planning permission, expired permission, allocation or none).
Permission Date	Date when planning permission was granted
Expiry Date	Date when planning permission expires. Planning permissions normally last for a period of 3 years after

Field	Description
	which they lapse unless a material start has been made on implementing the permission.
Application Name & Address	Details of the applicant who submitted the planning application.
Owner Details & Address	Details of the land owner(s) where known. Please note that this information is based on information held by the Planning Authority and may not be fully accurate as land ownership can change on a regular basis. It is suggested that the Land Registry is contacted for more accurate and up-to-date details of land ownership.
Developer Details / Agent Details and address	Details of the planning agent (if one used). Sometimes developers are known and these have been input into the database.

Site Details (where applicable)

Field	Description
House Type Details	Details of the house types where full or detailed planning permission has been granted.
Bedroom Details	Details of the dwelling size (measured by number of bedrooms) where full or detailed planning permission has been granted.
Tenure Details	Details of the house tenure of dwellings on sites where full or detailed planning permission has been granted.
Plot Details	Lists the number of units that are available on the site. This should be the same as the capacity field but is split down to sites that are actually built on a site, those that are currently under construction and those that remain to be started on sites. Only sites in Category 1 will have homes that are built or under construction.
New Build / Conversions	On sites that have planning permission there will be details on whether the dwellings are to be new build or conversions / change of use to residential.
Affordable Housing Units	Identification of affordable housing units secured through the planning process, normally by means of a S106 agreement.

Deliverability Details (5 Year Supply)

Field	Description
Suitable	<p>Each site has been assessed to determine its suitability for residential development. This included a general assessment against:</p> <ul style="list-style-type: none"> • planning policy restrictions; • physical problems or limitations; • potential impacts of a site being released for residential use; and • the living conditions that would be experienced by prospective residents. <p>On the summary sheet, sites are either given a Yes, No or Unsure response to the suitability assessment.</p>

Field	Description
Available	Each site was assessed to determine if the site was immediately available for residential development or was due to become available. This included a general assessment of whether sites are being brought forward by landowners and developers for short term development. On the summary sheet, sites are either given a Yes, No or D/K (Don't know) response to the availability assessment.
Achievable	This was an assessment of whether there was a reasonable prospect of sites being delivered within a five year period. An informed judgement was made regarding the achievability of each site based on a general analysis of housing market conditions and potential cost issues with bringing certain sites forward. The assessment also included an assessment of whether the site is likely to be viable to deliver. On the summary sheet, sites are either given a Yes, No or D/K (Don't know) response to the achievability assessment.
Deliverable	<p>Only sites that were considered to be suitable, available and achievable with a realistic prospect that housing would be delivered on the site within five years were considered to be deliverable and contributed to the five year supply of land for housing. In line with the NPPF, sites that are not major development, and sites with detailed planning permission, are considered deliverable until permission expires, unless there is clear evidence that homes will not be delivered within five years. Sites with outline planning permission, permission in principle, allocated in the development plan or identified on a brownfield register are only be considered deliverable where there is clear evidence that housing completions will begin on site within five years.</p> <p>It should be noted that the circumstances that can affect the deliverability of sites can change quite quickly (e.g. if a site that was previously unavailable becomes available and is put forward for development). There will be regular updates of the SHLAA to identify any change in circumstances that could affect the deliverability of a site or other associated information.</p>

Field	Description
Timeframe for Development	<p>Each site is split into a timeframe of when it is expected to come forward. These timescales are for indicative purposes only and sites may come forward sooner or later than expected.</p> <p>Short term: 2024-2029 (0 – 5 years) Medium term: 2029-2034 (6 – 10 years) Long term: 2034-2042 (11 - 18 years)</p> <p>It should be noted that for some sites, particularly large housing sites, the units may be considered to be delivered over two or more timeframes.</p>
Deliverability Comments	This is a general comments field with comments on whether sites are considered to be deliverable or whether they may be suitable for residential use in the longer term.

Constraint Details

On the summary sheets, general constraints are identified and are either given an N (no), Y (yes) or U (unknown) based on this desktop exercise. It should be noted that these results should be treated for indicative purposes only and more detail analysis should be taken by users of the SHLAA to determine if constraints exist (e.g. for the purposes of a planning application). For example, just because the assessment says 'No' under the contamination constraint, it does not mean that there are no contaminants on the site.

Field	Description
Contamination	This was a desktop exercise which assessed the potential for contamination. Use was made of the contaminated land survey to help identify whether any of the sites identified in the SHLAA were potentially contaminated. Please note that all sites that overlapped sites with potential contamination, even if this was only a slight encroachment, were identified as having potential contaminants.
Hazardous	This was assessed in much the same way as sites for potential contaminants were done. A desktop exercise helped to give an informed indication of whether potential hazardous substances existed on a site. Use was made of a 175m buffer strip around such sites to determine whether there was any hazardous risk. More detailed research would be required to give a more accurate position and the results (like the rest of the SHLAA) should only be treated as indicative.
Nature Conservation	Each site was assessed on the potential impact releasing a site for residential use would have on nature conservation. This related to things like impact on mature trees (TPOs) and other vegetation.
Built Heritage	Each site was assessed on any potential impact releasing a site for residential use would have on the

Field	Description
	Built Heritage. This relates to things like impact on Listed Buildings or conservation areas.
Flood Risk	Each site was assessed against its location in relation to whether there was a flood risk associated with the site in terms of fluvial flood risk. The level of risk has also been identified depending on whether all or part of a site is within flood zone 2 or 3. This is a major constraint to the release of sites for housing development under national planning policy.
Bad Neighbour	Each site was assessed to determine if a site was suitable for residential use in relation to neighbouring uses. This was to help determine the living conditions of future occupiers to help assess general suitability and also to assess the impact that introducing residential use into certain areas may have (e.g. introducing residential use into an area of employment may restrict the types of activity that can take place there to the detriment of employment opportunities).
Poor Access	<p>This was a general assessment of each sites vehicular access. Again it should be noted that the findings are only indicative and more detailed analysis of access arrangements would be needed to satisfy Highway Engineers for the purposes of a planning application.</p> <p>As the SHLAA evolves, it is the Council's intention to work closely with the Highways Agency to ensure that future housing development does not impact on the operation of the Strategic Road Network and roads that may impact on the M60 and M66 corridors.</p>
Negative Ecology	Each site was assessed against any potential impact releasing a site for residential use would have on Ecology. This relates to things like the potential impact on protected species or Sites of Biological Importance. Sites were generally considered harmful if they intersected across SBIs, SSSIs and/or Local Nature Reserves
Negative Air Quality	Each site was assessed to determine whether it was in an Air Quality Management Area.
Competing Uses	This was a general assessment looking at the availability of sites to help determine whether there were other more appropriate uses for each site or where the site could accommodate other uses. For example, sites might be in employment use and it may be more appropriate to continue that use.
Pylons	This was a simple assessment to determine if there was an overhead pylon within the boundary of the site.
Levels	This was a general assessment of the topography of each site, which could have an impact on the deliverability of sites.
Planning Constraints	This was a general assessment of current planning policy constraints and how this could affect the sites short term and long term prospects of delivering housing.

Field	Description
Multiple Ownership	This was a general assessment of the number of owners on sites as this can sometimes prevent sites from coming forward. Again, it is important to note that the SHLAA used information that was available to Officers at the time and there may have been changes to ownership details / number of owners since the information was compiled.
Green Belt / OPOL / RV	This was an assessment to determine whether or not a site or part of a site is on land that is either designated as Green Belt, Other Protected Open Land or River Valley land. These are considered to be significant constraints that are likely to affect the ability of a site to deliver housing.
Constraints Comments	General comments on any constraints identified in the assessment or the identification of further constraints on the site.
Constraint Solutions	This is a general comment field on how any identified development constraints may be overcome.
General Comments	This is a general comments field for any additional important information that has not been covered elsewhere.

Appendix 2 – SHLAA Schedule of Sites

Category 1: Under construction

Site ref.	Site Location	Neighbourhood Area ²	Source of Supply	Gross Site Area	Anticipated density	Anticipated units remaining	Availability
HL/0219/00	Eagle Bleachworks, Manchester Road, Blackford Bridge, Bury	Whitefield	Other	1.624	89	0	18 Years +
HL/2004/00	11 Bury Road, Radcliffe	West and Radcliffe	Planning Application	0.044	182	8	0 - 5 Years
HL/2146/01	East Lancs Paper site, Land between Cockclod Street/Cunliffe Street, Radcliffe Manchester, M26 9PG	West and Radcliffe	Planning Application	0.719	38	20	0 - 5 Years
HL/2157/00	Hutchinson Way/Hindle Street, Radcliffe	West and Radcliffe	Other	0.249	36	4	0 - 5 Years
HL/2200/00	Former Andrew Textiles Ltd site, Premier Mill, Walshaw Road, Bury, BL8 1NG	North Bury	Planning Permission	2.666	36	36	0 - 5 Years
HL/2286/00	Land adjacent Metro, Heys Road, Prestwich	Prestwich	Urban Potential	0.252	100	18	0 - 5 Years
HL/2297/00	Land at Springside Road (Christchurch Playing Fields), Bury	North Bury	LDF Site Suggestions	1.38	41	41	0 - 5 Years
HL/2303/00	Tetrosyl Site, Bevis Green Works, Walmersley Old Road, Bury	North Bury	Planning Permission	10.808	33	197	0 - 5 Years
HL/2311/00	Windacre Works, Mather Road, Bury, BL9 6RB	North Bury	Planning Permission	0.182	22	4	0 - 5 Years
HL/2338/00	Land at Bury Road/York Street, Radcliffe, Manchester, M26 2WH	West and Radcliffe	LDF Site Suggestions	6.209	42	211	0 - 5 Years
HL/2476/00	Plane Trees Farm, Bradley Fold Road, Ainsworth, Radcliffe	West and Radcliffe	Planning Permission	0.156	13	2	0 - 5 Years
HL/2479/00	J&H Hinchcliffe Haulage, Manchester Road, Gollinrod, Ramsbottom	North Bury	Planning Permission	0.151	26	4	11 - 18 Years

² The neighbourhood area is based on the centre of the site. Some sites may cross neighbourhood area boundaries.

Site ref.	Site Location	Neighbourhood Area ²	Source of Supply	Gross Site Area	Anticipated density	Anticipated units remaining	Availability
HL/2481/00	Land Adjacent to 7 Westlands, Whitefield	Whitefield	Planning Permission	0.064	63	4	6 - 10 Years
HL/2527/00	Former Whittaker House (remaining area), Whittaker Street, Radcliffe, M26 2TD	West and Radcliffe	Planning Permission	0.258	31	8	0 - 5 Years
HL/2527/01	Site of Former Whittaker House, Whittaker Street, Radcliffe, Manchester, M26 2TD	West and Radcliffe	Planning Permission	0.048	20	1	0 - 5 Years
HL/2583/00	Land south of Brick House Farm, Castle Road, Unsworth	Whitefield	Planning Permission	1.023	7	2	0 - 5 Years

HL/3277/00	137 The Rock, Bury, BL9 0ND	East Bury	Planning Permission	0.0364	357	13	0 - 5 Years

Category 1 Summary:

Availability	Number of Sites	Total Site Area	Total available and under construction
0-5 years	64	38.65	915
6-10 years	4	0.81	16
11-18 years	2	0.38	5
18+ years	1	1.62	0
Total	71	41.46	936

Please note that the summary figures above applies the total capacity of each site to the time period that it is expected to commence (regardless of whether sites will deliver housing over more than one timeframe). This is different to the summary tables in the main body of the report, which relate to when the units on each site will be delivered, according to the housing trajectory.

Category 2: Planning Permission

Site ref.	Site Location	Neighbourhood Area	Source of Supply	Site Area	Anticipated density	Anticipated capacity	Availability
HL/2127/00	Wellington Garage, Deardens Street, Bury	West and Radcliffe	Planning Permission	0.069	72	5	0 - 5 Years
HL/2146/00	East Lancs Paper Mill Site, Church St East, Cross Lane, Cock Clod St and Brook Street, Radcliffe M26 2PG	West and Radcliffe	Planning Permission	22.975	17	400	0 - 5 Years
HL/2148/00	Former Radcliffe High School, School Street, Radcliffe	West and Radcliffe	Planning Permission	2.307	39	90	0 - 5 Years
HL/2309/00	Land to west of 149 Brandlesholme Road, Bury	North Bury	Planning Permission	2.654	35	52	0 - 5 Years
HL/2339/00	Station House, Bury Road, Radcliffe	West and Radcliffe	Planning Permission	0.589	52	30	0 - 5 Years
HL/2374/01	Acorn Business Centre, Fountain Street North, Bury, BL9 7AN	East Bury	Planning Permission	0.105	181	19	6 - 10 Years

Category 2 Summary:

Availability	Number of Sites	Total Site Area	Total available and under construction
0-5 years	119	53.60	926
6-10 years	6	1.95	54
11-18 years	0	0.00	0
18+ years	0	0.00	0
Total	125	55.55	980

Please note that the summary figures above applies the total capacity of each site to the time period that it is expected to commence (regardless of whether sites will deliver housing over more than one timeframe). This is different to the summary tables in the main body of the report, which relate to when the units on each site will be delivered, according to the housing trajectory.

Category 3: Unitary Development Plan Allocations

Site ref.	Site Location	Neighbourhood Area	Source of Supply	Site Area	Anticipated density	Anticipated capacity	Availability
HL/0289/01	Land to the rear 35 - 39 Church Lane, Prestwich	Prestwich	Other	0.275	0	0	18 Years +
HL/0414/00	Land off Buller Street, Deardens Fold, Bury	West and Radcliffe	Other	1.458	50	40	11 - 18 Years
HL/1172/00	Rear of Nailers Green Hotel, Old Green Farm, Greenmount, Tottington	North Bury	Other	1.077	35	35	11 - 18 Years
HL/1581/00	Land west of 457 Tottington Road, Elton, Bury	North Bury	Other	0.509	0	0	18 Years +

Category 3 Summary:

Availability	Number of Sites	Total Site Area	Total available and under construction
0-5 years	0	0.00	0
6-10 years	0	0.00	0
11-18 years	2	2.54	75
18+ years	2	0.78	0
Total	4	3.32	75

Please note that the summary figures above applies the total capacity of each site to the time period that it is expected to commence (regardless of whether sites will deliver housing over more than one timeframe). This is different to the summary tables in the main body of the report, which relate to when the units on each site will be delivered, according to the housing trajectory. The total figures tally with the figures in the main report.

Category 5 Summary:

Availability	Number of Sites	Total Site Area	Total available and under construction
Total	106	86.11	2,720

Category 6: Places for Everyone Site Allocations

Site ref.	Site Location	Neighbourhood Area ³	Source of Supply	Site Area	Anticipated density	Anticipated capacity	Availability
HL/2518/00	Remaining part of Places for Everyone Allocation JPA8 Seedfield	East Bury	PfE Allocation	2.206	24	54	11 - 18 Years
HL/2847/00	Places for Everyone Site Allocation JPA7 - Elton Reservoir	West & Radcliffe	GMSF C4S 2015/16	251.663	14	3500	0 - 5 Years
HL/2848/00	Places for Everyone Site Allocation JPA9 - Walshaw	North Bury	GMSF C4S 2015/16	63.588	20	1250	0 - 5 Years
HL/2900/01	Places for Everyone Site Allocation JPA1.1 - Heywood and Pilsforth (Northern Gateway)	Whitefield	GMSF C4S 2015/16	20.681	10	200	0 - 5 Years
HL/2900/02	Places for Everyone Site Allocation JPA1.2 - Simister and Bowlee (Northern Gateway)	Prestwich	GMSF C4S 2015/16	73.802	18	1350	0 - 5 Years

In addition to the above sites, Site ref. HL/2518/01 - Seedfield is also allocated through the Places for Everyone Joint Development Plan but has been included within Category 2 for 84 dwellings because part of the site has planning permission.

Category 6 Summary:

Availability	Number of Sites	Total Site Area	Total available and under construction
0-5 years	4	409.73	6,300
6-10 years	0	0.00	0
11-18 years	1	2.21	54
18+ years	0	0.00	0
Total	5	411.94	6,354

Please note that the summary figures above applies the total capacity of each site to the time period that it is expected to commence (regardless of whether sites will deliver housing over more than one timeframe). This is different to the summary tables in the main body

³ The neighbourhood area is based on the centre of the site. Some sites cross neighbourhood area boundaries.

of the report, which relate to when the units on each site will be delivered, according to the housing trajectory. The total figures tally with the figures in the main report.

Category 7 Summary:

Availability	Number of Sites	Total Site Area	Total available and under construction
Total	112	1,251.41	28,732

Appendix 3 – Summary of Constrained Sites

Site Ref.	Site Location	Neighbourhood Area ⁵	Site Area	Constraint Details
HL/1958/00	Former Petrol Station, Parr Lane, Unsworth, Bury	Whitefield	0.099	Planning permission lapsed but suitable small site. Currently in use with no indication that it will be made available for development. Could come forward as a future small site windfall if current use ceases.
HL/2057/00	Fairfield Service Station, Rochdale Old Road, Bury	East Bury	0.104	Site has potential to deliver housing and has previously had permission but is currently in use as car wash area with no indication that it will be made available for development.
HL/2058/00	Radcliffe Building Supplies Ltd, Lord Street, Radcliffe	West & Radcliffe	0.899	Expired planning permission but still in use as building supplies.
HL/2084/00	93-95 Heywood Road, Prestwich	Prestwich	0.272	Expired planning permission but building still occupied.
HL/2125/00	Barn at Meadowcroft Fold Farm, Off Whittle Lane, Pilsworth, Bury, OL10 2RE	Whitefield	0.609	Permission has lapsed. Could come forward if a new application was submitted. Sits within Heywood / Pilsworth PfE allocation.
HL/2133/00	Windley Works, Wolsey Street, Radcliffe	West & Radcliffe	0.18	Has potential to be converted as per previous permission. Currently managed by Heaton Estates as a business centre.
HL/2165/00	Corner Ainsworth Rd/Hardman St - Constellation Mill, Radcliffe	West & Radcliffe	0.92	Site is constrained as it is identified as being suitable for continued employment use in the Employment Land Review.
HL/2168/00	Off Vale Street, Radcliffe	West & Radcliffe	0.297	Site is constrained as it is identified as being suitable for continued employment use in the Employment Land Review.
HL/2170/00	Land adjacent 75 Hollins Lane, Bury	Whitefield	0.128	Site is constrained as it is part of the adjacent works and not available for development.
HL/2187/00	Tanners (Land off Bramworth Av), Ramsbottom	North Bury	2.585	Site is constrained as the land is considered to be unstable and may not be suitable for residential development. It also has poor access. Further evidence is required to determine if site could deliver residential development.
HL/2192/00	Auto Rescue, Stubbins Lane, Ramsbottom	North Bury	0.242	Site is constrained as it is identified as being suitable for continued employment use in the Employment Land Review. The site also has a significant flood risk.

⁵ The neighbourhood area is based on the centre of the site. Some sites cross neighbourhood area boundaries.

Site Ref.	Site Location	Neighbourhood Area ⁵	Site Area	Constraint Details
HL/2193/00	North of P.F.S Stubbins Lane, Ramsbottom	North Bury	0.339	Site is constrained as the site forms part of an Employment Generating Area.
HL/2202/00	Harwood Road, Tottington	North Bury	0.137	Site is constrained as the site is currently used as formal recreation / amenity space.
HL/2203/00	Booth Farm - Off Booth Street, Tottington	North Bury	0.448	Planning application withdrawn 2004 due to previous policy restrictions on housing development. Still in use so not currently available.
HL/2204/00	Spring Vale Street, Tottington	North Bury	0.404	Site is constrained as it is identified as being suitable for continued employment use in the Employment Land Review.
HL/2211/00	Victoria Street area, Bury	North Bury	0.562	Site has a number of owners and not considered to be available in the short to medium term. The site is also constrained as a number of employment uses have been identified as being suitable for continued employment use.
HL/2214/00	Wood Street car park, Bury	West & Radcliffe	0.216	Site is constrained and the site may not be suitable for residential development due to the nature of the surroundings, including the large gas works that sits adjacent the site.
HL/2245/00	Land off Bolton Street, Bury	East Bury	0.103	Site is constrained as it is identified as being suitable for continued employment use in the Employment Land Review.
HL/2247/00	Adj 37 Huntley Mount Road, Bury	East Bury	0.071	Site is constrained as it is identified as being suitable for continued employment use in the Employment Land Review.
HL/2249/00	Land Adjacent to 1 Ribchester Drive, Bury	East Bury	0.129	Planning permission 55198 for 5 townhouses lapsed 02/10/15. More recent refusal due to failure to address flood risk issues, therefore site is considered constrained.
HL/2250/00	Off Cemetery Road, Radcliffe	West & Radcliffe	0.674	Site is constrained as it is identified as being suitable for continued employment use in the Employment Land Review.
HL/2251/00	Rear of Robertson Street, Radcliffe.	West & Radcliffe	0.527	Site is constrained as it is identified as being suitable for continued employment use in the Employment Land Review.
HL/2259/00	Grey Street, Haworth Street, Radcliffe	West & Radcliffe	0.087	Site is constrained as currently being used as part of the adjacent employment use, which has been identified as being suitable for continued employment use.
HL/2262/00	Crown Works, Withins Street	West & Radcliffe	0.079	Site previously had planning permission for residential development. Site is still in use.
HL/2267/00	Mill Street/Outwood Road/Lodge Road, Radcliffe	West & Radcliffe	0.872	Site is constrained by flood risk issues.

Site Ref.	Site Location	Neighbourhood Area ⁵	Site Area	Constraint Details
HL/2268/00	Outwood Road/Lodge Road, Lodge Brow, Radcliffe	West & Radcliffe	1.005	Site is constrained as it is identified as being suitable for continued employment use in the Employment Land Review.
HL/2269/00	Apex House, Bolton Street, Radcliffe	West & Radcliffe	0.109	Site is constrained as it is identified as being suitable for continued employment use in the Employment Land Review.
HL/2270/00	Hollybank Street	West & Radcliffe	0.56	Site is constrained as it is identified as being suitable for continued employment use in the Employment Land Review.
HL/2271/00	Hollybank Street/Bradshaw Street, Radcliffe	West & Radcliffe	0.767	Site is constrained as it is identified as being suitable for continued employment use in the Employment Land Review.
HL/2273/00	Works off North Street, Radcliffe	West & Radcliffe	1.062	Site is constrained as it is identified as being suitable for continued employment use in the Employment Land Review.
HL/2274/00	Motor Tune site, Outwood Road, Radcliffe	West & Radcliffe	0.193	Site is constrained as it is identified as being suitable for continued employment use in the Employment Land Review.
HL/2275/00	Bury Road Works and other buildings, Bury Road, Radcliffe	West & Radcliffe	0.218	Site is constrained as it is identified as being suitable for continued employment use in the Employment Land Review.
HL/2280/00	Greengate Lane, Prestwich	Prestwich	0.452	Site is constrained as it is identified as being suitable for continued employment use in the Employment Land Review.
HL/2287/00	Land south of Milltown Street, Radcliffe, Bury	West & Radcliffe	1.995	Site is constrained due to its location within the River Valley. Site is also predominantly previously undeveloped and has physical constraints relating to its sloping nature.
HL/2293/00	Alfred Works, Woodhill Street, Bury	North Bury	0.257	Site is constrained as it is identified as being suitable for continued employment use in the Employment Land Review.
HL/2301/00	Bolholt Garage, Bury Road, Tottington	North Bury	0.201	From Allocations DPD Initial Site Suggestion Exercise 2007. Site is constrained as it is currently in employment use and has been identified as being suitable for continued employment use.
HL/2325/00	Broadhey Playing Fields, off Ripon Hall Avenue, Ramsbottom	North Bury	3.443	Site identified from the Site Allocations DPD Initial Site Suggestion Exercise 2007 and also submitted as part of Local Plan Call for Sites Exercise in Sept/Oct 2017 but is considered constrained as it is protected recreation.
